The Spanish frigate which was to convoy a ship with 2,000,000 dollars on board for the King of Spain, returned to Havana, previous to the 26th ult. having parted company with her off St. Augustine. The Galleon may fall into the hands of some of the South American cruizers.

The ship Norfolk, Harding, at Norfolk, sailed from Cape Measurado on the 26th Sept. and on the 22d of Oct. touched at Port Prayra, where she found Mr. Hodges, the U. S. Consul, and all his family, sick, Mr. Elsey, a clerk having died the day previous. On the 24th, arrived at the Isle of May, having had light winds and calms the whole passage from the Cape, and on the 30th received intelligence of the death of Mr. Hodges. The whole Island of St. Jago was so unhealthy that whole families were moving to Fogo. Dr. Todson has come home in the Norfolk from Liberia.—[Norfolk Herald, 10th Dec.

MINISTER TO ENGLAND.—Rumor has been busy, in fixing on some person to succeed Mr. Gallatin at the British Court, and Mr. Webster, Mr. Clay, Mr. Spencer of N. Y, and Mr. Sergeant of Philadelphia have been named. But is it at all necessary that another minister should be sent at present?

Governor Dalhousie, of Lower-Canada, detained a brig for the purpose of forwarding to the British Ministry, a full account of his difficulty with the Provincial Parliament. But before she was despatched the St. Lawrence became obstructed by ice, and the Parliament, taking advantage of this circumstance, have delegated six members to proceed to England and prefer charges against their Governor.—[Boston Pat.

CONGRESS.—In the Senate, on Thursday, Mr. Dickerson gave notice that he should on the next day introduce a bill for the distribution of a portion of the revenue of the United States among the several States. The bill for the abolition of imprisonment for debt was reported from the committee on that subject, with amendments, and made the order of the day for Wednesday next.

In the House of Representatives, a resolution was offered by Mr. P. P. Barbour, referring it to the committee of ways and means to enquire into the expediency of throwing into the market the stock of seven millions held by the Government in the Bank of the United States. Mr. Barbour explained that his chief object was to obtain the premium at which the stock now stands, and apply it towards the extinguishment of the public debt. It was replied to by Mr. M'Duffie and Mr. Gorham, that the very rumor of the intention of the Government to throw that amount of stock into the market, and to withdraw from its connection with the Bank, would reduce the stock to its par value. The resolution, on motion of Mr. Gorham, was then laid on the table.

A wretch named William Armstrong put an end to his existence at Chillicothe, Ohio, on the 6th Dec. by attempting to drink a quart of whiskey, which some foolish persons had agreed to give him for that purpose. One of these persons, it is said, has been obliged to give bail for having used some compulsion towards Armstrong to make him drink the spirit. After buzzing for Jackson, he drank off about three fourths of it in a few minutes, but he survived the draught, only until the evening.—It is said he went to Chillicothe, for the purpose of teaching a school ; if so, we think his example will be of far greater profit to the rising generation than his precepts would have been.

NATURALIZATION LAWS.—At the close of the revolutionary war, when independence crowned a struggle in which all had been put at hazard by the colonists and sufferings, which nothing but a deep and inextinguishable love of liberty would have endured, had been rewarded by success; it became the policy of the comparative handful of Americans, who then possessed this fair shore, to induce emigration to their shore, by an offer upon the easiest terms of all the rights and privileges of citizenship to those who might adventure. Of this offer many soon availed themselves from choice; and, in the course of a few years, many more; whom the political convulsion of Europe had deranged, came hither, not from any particular preference of our systems or institutions, but as the only secure asylum against the oppressions under which they laboured under the old world. A [illegible] higher, wages, which, [illegible] marching forward in a career of almost unexampled prosperity, but still thinly populated, rewarded the industry of man; thousands and tens of thousands of the laborers from countries where population exceeded the means of subsistence, and the demand for labor, flocked hither and all became equal with the sons of the soil. Such was the law, and of the policy of its provision we do not now mean to make a question. Still less would we seek to disturb what is done—or in any manner to invalidate privileges, thus fairly conceded and legally acquired. But we do propound as a very serious consideration, and one which may well engage the attention of all patriotic minds, whether the policy, which in a young and thinly populated country might be both wise and expedient, be entitled to equal favor in a nation of many millions, and where already the supply of native population is equal to the demand of the country, for service or defence. To us it appears as a general proposition, both plain and just, that political privileges should belong exclusively to the natives of the country, and though circumstances, such as we have referred to, in the early history of our own land, may constitute a temporary exception, the truth and force of the general rule remain unimpaired, and recur in all their force, as soon as the circumstances of the moment which caused the exception, have ceased to operate. Hence, in our view of the subject there can be no more necessary or proper change made in any of our organic laws, than one that shall henceforth deny to any emigrant from a foreign land all political privileges in this. The distinction we take, will, we trust, be noted—political privileges. We would concede all civil rights, [illegible] the safe acquisition, [illegible], and [illegible] of property—perfect equality in the eye of the law, [illegible] the native—every privilege, in short, which can conduce to the welfare of the citizen, and which the native enjoys, save and except that of voting, or being voted for, for offices of political trust. This one high and sacred privilege should be reserved for the sons of the soil alone.

In now making this suggestion, we are not acting under the impression of any recent events, or pronouncing opinions lately adopted ; they have long been entertained, and in private very frequently expressed by us ; and from the general concurrence in our views of this subject, of those with whom we have at various times conversed, we are inclined to believe that an alteration in our naturalization laws, tending, gradually perhaps, to bring about the result indicated above, would be almost universally acceptable.

REMOVAL.

SULPHUROUS BATHS

DOCTOR RENOU, has the honor of informing his colleagues and the inhabitants of New-Orleans and of Louisiana, that he has removed his establishment of *Sulphurous Baths* from [illegible] Street, No. 122 to Barracks Street No. 165, at the corner of Burgundy in the house lately occupied by Dr. Fermento.

It is generally known, how much benefit is obtained by sulphurous bath in cutaneous diseases, rheumatic complaints, palsies and other serious complaints, it is needless to quote here the numerous instances of immediate cure and relief afforded by the application of that remedy.

Mr. Renou has availed himself of his removal, in constructing a new bathing and making his establishment free from any kind of reproach that could have been made to the former one.

The room for the reception of white people is totally separate from the one fixed for negroes.

His new lodgings afford him the means of receiving certain number of sick persons wishing to board at his house.

He has provided a spacious hospital, and his house being situated in a retired part of the town less crowded with houses than others, makes the situation perfectly wholesome.

Doctor Renou will however take with the persons who will apply to him all possible arrangements.

During the last year of his practice in Paris, Doctor Renou has been intimate with the celebrated Dr. Ducamp inventor of the most efficient method of curing the chorga (retention of urine,) and he had especially addicted himself to the treatment of that disease ; he has now in his possession a complete collection of all the instruments necessary thereto. He may ensure to those persons affected with the above complaint, who will apply to him, a prompt and safe cure from his method of treatment. dec. 24
