CONGRESS.—*Extension of the Drawback System.*

In the House of representatives, on Monday last, Mr. Cambreleng, from the committee on commerce, made a report, accompanied by the following bill:

A BILL extending the term within which merchandise may be exported with the benefit of drawback.

Be it enacted, &c. That, from and after the passage of this act, all goods, wares, and merchandise, which are now entitled to debenture, or which may be hereafter imported, may be exported with the benefit of drawback, and without any deduction from the amount of the duty on the same, at any time within two years from the date when the same may have been, or shall be imported:—*Provided,* That all existing laws regulating the exportation of goods, wares, and merchandise, shall have been, in all other respects, complied with: *And provided, further,* That this act shall not be so construed as to alter, in any manner, the terms of credit now allowed by law for the duties on goods, wares, or merchandise, imported.

And be it further enacted, That, if, at the expiration of two years from the date when imported, the owner or consignee of any goods, wares, or merchandize, shall produce to the Secretary of the Treasury a certificate of the Collector of the Port where the same may have been imported, setting forth that the duties and all other charges on such goods, wares, or merchandise, have been paid, and shall apply for the privilege of exporting the same, with debenture for a further term, the Secretary of the Treasury is hereby authorised to extend the term beyond the limitation in the first section of this act.

In the House of Representatives, on Wednesday, several bills were reported and committed. Among these were a bill to lay out and make a National road from the city of Washington to the city of New-Orleans; two bills for the relief of purchasers of public lands, which were ordered to be engrossed and read a third time on Thursday.

In the SENATE a bill was reported from the select Committee on the subject for the relief of the surviving Officers of the revolution. The bill for abolishing imprisonment for Debt was taken up, and, in some immaterial points, amended.

January 4.—In the Senate the day was principally occupied in debating amendments to the bill for abolishing imprisonment for debt. The bill was made the order of the day for Monday.

[From the N. Y Daily Advertiser, Jan, 7.]

Massachusetts.—The legislature of Massachusetts assembled on Wednesday last, with a full attendance of members in both branches.

The Governor, in his speech, says that at a time when the State is free from all political excitement, the time is peculiarly favorable for the prosecution of the proposed works for internal improvement. He says the report of the commissioners appointed to survey a railway route from Boston to the Hudson will soon be laid before the Legislature; and that they have found in their survey no obstacle too great to be overcome by "an enlightened spirit of enterprize." The canal route from Boston to the Blackstone canal, and the rail route from Boston to Providence have been found remarkably level and favorable, although the surveys have not been completed.

The Senate prison, instead of yielding a balance to the credit of the State, during the last year caused the accumulation of a debt of 6,000 dollars. The Governor cannot account for this deficit; and the probability is that the financial concerns of prisons are but little better understood in this country generally, than the best system for confining and reforming prisonners, and reducing the number of crimes and offences. Necessary information has been disseminated to some degree, but much yet remains to be done.

The expenditures of the State have been much greater than the revenue and the Governor recommeds a state tax.

In the U. S. Senate on Monday, Mr. Hayne presented the memorial of sundry citizens of Boston and its vicinity, praying that no additional duty may be imposed on imports, especially on Woollens. The Committee of Finance reported, without amendment, the bill, repealing in part the duty on imported salt.—*N. Y. Ev. Post. Dec. 20.*

A distressing accident occurred in the town of Greenwich, Con. on Christmas day, by the explosion of a cask of powder. The powder was in an upper room of a dwelling house, (the ower's name not recollected,) and it is supposed fire was communicated to it by a child, who, observing a number of boys burning powder according to holiday customs, was led to follow their example, and going to the cask with fire, an explosion took place, which tore off nearly all the upper part of the house, and sadly shattered the whole building. The child was alive when found, but it was thought could not survive.—*Narwalk Gazette.*

[From the New-York American, Jan. 5.]

We have just received the Governor's Message, but at too late an hour for insertion to-day.

He speaks in terms of regret at the exasperation of party spirit, which invades the domestic hearth and spares not the female character—thinks much of the evil to be ascribed to the re-eligibility of the President—recommends additional canals—new courts of justice—two houses of a N. Y. Corporation—searches for coal—high schools—infant schools—good morals—the abolition of duelling—and the pacification of exasperated palitical feelings, &c. &c.

By a notice published at Rome, on the 30th of August, all the Members of the Clergy in the States of the Church, and all the Riligious Communities of both sexes, are recommended to use no garments made of foreign wool, or of which such wool forms a part. The Pope himself has set the example, and enjoins all persons who receive salaries, or other money from the Treasury, to comply with the above recommendation, the object of which is to encourage the manufactures of the country.

HELVETIC INSTITUTION.

IN order to give greater latitude to the [illegible] of education, Mr. De Fernex has [illegible] partner in his Seminary, Mr. T. W. Wheelwright of Massachusetts, a young man recommended to public confidence as well by his talents as his personal qualities. Having been graduated at a college in New-England, Mr. Wheelwright will be enabled to take charge of the whole course of English instruction. The institution of Mr. De Fernex will thus offer to young men the double advantage of preparing some to be admitted into the colleges of the United States, and of furnishing to others a complete course of education adapted to the commercial and ordinary pursuits of life.

Mild regulations, but rigidly adhered to, will give to this seminary the character of an Helvetic school. In the proposed plan of teaching, the connexion between the memory and judgment will always be kept in view, and no pains spared to facilitate the attainment of different branches of study by the most simple and familiar illustrations. In a word, the object of this seminary will be the communication of valuable knowledge, and the formation of those mental and moral habits in young persons, which shall early lay the foundation for their respectability and usefulness in subsequent life.

The institution is already in progress, at the house of Mr. De Fernex, No. 116 Royal Street.

REMOVAL.

SULPHUROUS BATHS.

DOCTTOR RENOU, has the honor of informing his colleagues and the inhabitants of New-Orleans and of Louisiana, that he has removed his establishment of *Sulphurous Baths* from St. Ann Street, No. 122 to Barraks Street No. 156, at the corner of Burgundy in the house lately occupied by Dr. Formento.

It is generally known, how much benefit is obtained by sulphurous bath in cutaneous diseases, rhumatic complaints, palsies and other serious complaints, it is needless to quote here the numerous instances of immediate cure and relief afforded by the application of that remedy.

Mr. Renou has availed himself of his removal, in constructing a new apparatus and making his establishment free from any kind of reproach that could have been made to the former one.

The room for the reception of white people is totally separate from the one fixed for negroes.

His new lodgings afford him the means of receiving certain number of sick persons wishing to board at his house.

He has provided a spacious hospital, and his house being situated in a retired part of the town less crowded with houses than others, makes the situation perfectly wholesome.

Prices for 12 *Baths,* . . . $ 16 ,,

Doctor Renou will however take with the persons who will apply to him all possible arrangements.

During the last year of his practice in Paris, Doctor Renou has been intimate with the celebrated Dr. Ducamp inventor of the most efficient method of curing ischurgs (retention of urine,) and he has especially addicted himself to the treatment of that disease; he has now in his possession a complete collection of all the instruments necessary thereto. He may ensure to those persons affected with the above complaint, who will apply to him, a prompt and safe cure from his method of treatment. dec. 24
