TO PLANTERS, FARMERS, &c. &c.—By Her Majesty's Royal Letters Patent—Patent Cotton Seed Hand Mill, by which one man can grind and draw off one peck of wheat per hour by a single operation.

The mill is also manufactured for grinding wheat, Indian corn, coffee, rice, and almost any dry substance, and will perform considerably more with less labour than any mill yet brought before the public in this country or Europe.

They are made with either metal grinders or stones, and to vary any extent of power, and their easy capability of being attached to thrashing machines, steam-engines, water wheels, horse or ox power; render them invaluable to agriculturists, heads of families, public institutions, grocers, emigrants, &c.

The mode of applying this power is upon an entirely new principle, enabling more men to work in a given space with less fatigue than any plan now in operation.

Planters, farmers and others may be supplied with mills by which one man can shell the Indian corn, grind three peck of barley, or crush one bushel of oats per hour. Also mills of one horse power capable of shelling from 40 to 60 bushels of corn, grinding three bushels of barley, or crushing four bushels of flour. These mills may be easily attached to a thrashing machine.

The simplicity of the arrangement nearly prevents the possibility of their getting out of repair.

ALSO,

The above may be seen at Banks' Arcade. d8
