The New-Orleans Daily Bee

Saturday Morning, Nov. 11, 1848.

The Mail failed again yesterday from beyond Charleston

☞ The papers that we receive by mail are exceedingly barren of interest. They are filled with appeals to the voters, political squibs, and arguments in favor of the several candidates, which now, that the election is over and the result in a measure ascertained, seem to us as insipid and flat as a cold buck wheat cake. This, however, is the natural result of that reaction which necessarily follows strong excitement. Our feelings in this quarter are nearly tamed down to the ordinary standard, and we have the relish for vehement outpourings of party zeal, which our own has been quieted by the termination of the contest. Yet, a few days more, and all the turmoil attendant upon the Presidential election will have subsided, and the passions of the opposing parties, roused erewhile almost to a pitch of uncontrollable frenzy, will be no longer visible. The exultation of the victors, and the sorrows of the vanquished will alike disappear, and men will resume their usual avocations, and talk over the contest with a calmness and tranquility, that a week ago would have appeared monstrous and unnatural

Georgia. The Result.

In all the calculations of the Cass party Georgia has been classed as a certain State for their candidate. After the Congressional election in October, the friends of Gen. Taylor considered her vote doubtful. We were decidedly of opinion that she would go for Taylor, and the result justifies our confidence. The latest and fullest intelligence from Georgia is contained in a despatch from Macon, published in the *Delta*. It states that full returns have been received for forty five counties—embracing many of the Whig and Locofoco strongholds. These counties are as follows. Bibb, Muscogee, Chatham, Richmond, Wilkinson, Houston, Upson, Crawford, Harris, Baldwin, Monroe, Pike, Columbia, Washington, Jones, Twiggs, Irwin, Clay, Dooly, Cass, Walker, Wilkes, Fayette, Bass, Merriwether, Jasper, Paulding, Pulaski, Warren, Murray, Wilkes, Twoterel, Greene, Oglethorpe, Clarke, Morgan, New-ton, Troup, Floyd, Perry, Cowetta, Talbot, Macon, Putnam and DeKalb. The Democratic loss in these counties (nearly half the State) is 1316. In the whole State the Democratic majority was 251. It, therefore, in that the counties that majority has been annihilated, leaving 965 votes to spare, it is fairly presumeable that Georgia has given about two thousand majority to TAYLOR and FILLMORE.

Add Georgia to Massachusetts, Vermont, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, North Carolina, Louisiana, Florida, Kentucky and Tennessee and Gen. Taylor will have 163 Electoral Votes certain. We say nothing of Maine, Virginia, Alabama, Mississippi, Indiana, Michigan, Wisconsin, Illinois and Iowa—for where are more or less doubtful. We are disposed at the moment, to believe that Taylor has a fair chance of obtaining 200 Electoral Votes, though it is possible that he may not receive more than the number we have already given to him. But *none certain*. All doubt of his election is over—the only question to be solved is the amount of his majority in the Electoral Colleges, and this will probably be ascertained within the next twenty eight hours.

The Elections.

The returns received yesterday add but very little of importance to our information. We only we have received none last evening—So soon as any Telegraphic despatches arrive before us, they will be found under their proper heads.

LOUISIANA.

Left ion—The Caminada precinct gives 9 votes to Taylor and 9 to Cass. The entire vote of the Parish is therefore as follows. Taylor, 717. Cass, 660—majority, 57. Gain, 26.

West Feliciana complete gives Cass 29 majority. Gain for Taylor, 35

Caswell—Taylor, 268; Cass, 231. Majority for Taylor 31. Gain, 65.

Bienville—Four precincts heard from. Taylor's majority is 81. The remaining precincts will give an increase this. Gain, so far, 76.

St. Helena—Reported majority for Cass, 13. Gain, 54.

St. Landry—Several reports from this large Parish have been received. One puts the majority for Taylor at 407. Five precincts to be heard from, which will not materially vary the result. Another, purporting to give the vote or majority at every precinct, sets down Taylor's majority in the parish at 577. This is the more probable of the two. In 1844 Mr. Clay received 383 majority on St. Landry.

Pointe Coupee is reported, we know not upon what authority, to have given Cass 131 majority. This, if true, would be a Locofococo gain of 132 vote.

To sum up, taking the lowest estimate made for Taylor, and the highest for Cass, Taylor's majority in 21 parishes is 2,003. The same parishes, in 1844, gave Mr. Clay 273 majority. The Whig gain is therefore 2,724. The remaining parishes gave Mr. Polk 971 majority. We think it not unlikely that the result will prove that we have overcome that majority and will leave us about 2,500 in the State.

MISSISSIPPI.

Nothing definite from our sister State. A heavy Whig gain in Warren county is reported, and some are sanguine enough to believe that Taylor has carried the State. We doubt it. Taylor must gain fully one hundred votes in every county in Mississippi to succeed in that. He may have done so, but we cannot believe it, and we see some tangible evidence of the fact

FIRST GUN FROM FLORIDA.—At Pensacola, (Escambia county Taylor's majority is 110; at the Navy Yard, Cass's majority 47. These two precincts exhibit a gain of 16 votes since the October election.

A REMARKABLE ECHO.—A most singular and remarkable echo was discovered by the Locofoco papers in a neighboring State on Tuesday, Oct. 10th. The question was,

WHERE'S THAT TAYLOR MAJORITY?

The echo to the inquiry came back from a thousand cavern'd notes, a thousand factories, and a thousand furnaces,

PENNSYLVANIA!!!

The consequence of this astounding and unexpected answer are of the most serious nature. An excellent old gentleman, named Morris Longstreth, was knocked into a cocked hat by the reaction; and two members of Congress, who stood by grinning when the question was pronounced, have not been "heern tell on" since. About two dozen members of the legislature mysteriously disappeared at the same time. So much for asking impertinent questions.

THE AMERICAN BOARD OF FOREIGN MISSIONS.

A correspondent of the Newark *Advertiser*, gives the following account of the conclusion of the session of the Board of Foreign Missions:

"The principal part of the time was occupied in deliberations upon the best mode of relieving the treasury and keeping the wheels in motion The feeling became so earnest on this subject that gentlemen came forward and made donations and subscriptions on the spot until the sum actually amounted to $20,000. The debt was $60,000, and is thus materially reduced at once and an appeal is sent out to pastors and churches in all parts of the country, that will be responded to, it is believed, and the hope is cherished that the debt will be immediately extinguished.

WOODEN GUNPOWDER.—From sundry recent experiments, the fact is established that fine saw dust or rasped wood, steeped in a mixture of concentrated sulphuric and nitric acids, and afterwards washed and dried, will explode similar to common gunpowder, and if rightly managed, with much greater force. The greatest wonder about it is that the thing had not been discovered earlier.

BY TELEGRAPH.

(TRANSMITTED TO THE N. O. BEE)

Montgomery, Nov. 10th.

Alabama

Taylor's majority in Wilcox is 300; in Perry 150; in Monroe, 300 and in Greene 600. In 15 counties Taylor gains 3,000 over the vote of Clay. (There are fifty counties in the State. Polk's majority was 11,422. We can form no opinion of the result, until we hear from Jackson, Madison, Clay, Marshall and other strongholds of Locofoco. *—Editors Bee.*)

The Hibernian's News.

The English papers by the *Hibernia* contain nothing of particular moment. Lord Clarendon has gone to London to consult the Government upon the course to be adopted in respect to Smith O'Brien. It is considered certain that he will not be subjected to capital punishment.

There has been a severe provision riot at Hawre in consequence of the mob interfering with some English vessels which were loading with potatoes. Fourteen soldiers and thirty people were killed or wounded.

The Commercial advices by the *Hibernia* are very gloomy. Brown's circular quotes Fair Cotton at 4¾d.; Middling 3¾d.; inferior grades North Alabama unsaleable at 1¾d.

Cleared at Liverpool, ships Anna Hope, Archelaus, Harmony, Caledonia, Lascand, Thornhill, Henry, Alexander and Chalmer. Cleared at Bremen, ships Upland, Henry Bacon and Julius; at Havre, ships Vesta, Mayflower, Ferriere, Helvoet, Emily Taylor, Hebron; cleared at New York, ships Galveston, Regulus, at Boston, ships Orlando and Statesman.

SECOND DESPATCH.

Alabama Probably for Taylor! Tennessee Overwhelmingly Whig! Georgia Whig by over 2,000!

Last evening we received the following brief but most eloquent and expressive despatch from our Montgomery Correspondent:

MONTGOMERY, Nov. 10th.

From the information thus far received, there is every reason to believe that Taylor will carry ALABAMA. Many Democrats give it up. Benton county gives 400 majority for Cass. Barbour 450 for Taylor.

TENNESSEE has gone for Taylor by TEN THOUSAND majority.

Fifty six counties in Georgia exhibit a gain for Taylor of 2,000 over the October election.

JUNIUS.

THE ORLEANS THEATRE.—This popular establishment opens on Tuesday evening, with the admired opera "*La Favorita*"—one of the lamentable Donizetti's choicest predictions The lovers of song will have an opportunity of hearing the new tenor Mons. DULCE, an artist of whom report speaks in the very highest terms, and whom the connoisseurs who have heard him in France, declare to be the finest tenor in America. The charming and accomplished ESTELLE JOLLY appears in one of her most characteristic—Leonore. The new baryitone and basso will likewise make their debut They are both said to be vocalists of decided merit.

☞ What a noble majority the City and County of Philadelphia have given to Taylor. Nine thousand seven hundred and thirty. Nearly five thousand gain over the Governor's vote. The Whigs of Philadelphia promised 8,000, but have done far better than they themselves expected. From the immense gains in the Counties heard from, we are induced to believe that Pennsylvania has given Taylor from ten to fifteen thousand majority.

☞ The Mobile *Tribune* of Thursday, says: We received intelligence last week, as then mentioned, that S. G. Fisher, Esq., and Dr. Levert had accomplished the object of their mission to London, in procuring the stoppage of the West India Mail Steamers in our bay. Dr. Levert has since returned, and has laid before the city authorities the agreement entered into with the Royal Mail Steam Packets. In regard to the various regulations of the company, satisfactory arrangements were made.—The subject of the Tuscaloosa coal was discussed, and in the event that it should be found to be unsuitable for fuel, English coal may be introduced (in case a coal depot should be established at Mobile Point,) on a satisfactory footing. After an examination of the whole route of the steamers, and due consideration given to our position, we doubt not, Mobile Point will be fixed upon as the best possible place on the Gulf of Mexico. In that event, we feel assured the Tuscaloosa coal, upon a fair and impartial trial, will be found equal to the best American or English kinds.

A LONG JOURNEY.—The St. Louis *Revellie* of the 1st says: Captain Dunlap and 46 men and horses, recently attached to the Illinois volunteers serving South, reached this city on Saturday last on the steamer *Boreas*, No. 3. These men were detailed to escort a Government train from Camargo, a distance of 1500 miles, to a point on Red River—from whence they proceeded to the mouth, and from thence to this city, as above stated. They are the last of the Illinois volunteers serving South to reach their homes. A portion of them took passage on the Alton packets on Saturday evening, but the majority again mounted their horses and rode boldly forth, this time to join their friends in the Sucker State.

A MYSTERY.—Considerable excitement has been caused lately in Allegheny city, Pa., by the discovery of a supposed murder. The story runs that a stranger was found dead, sitting bolt upright in a buggy, with a severe wound in his forehead; no blood was found near him, but a considerable distance off, say a quarter of a mile, a large quantity of blood was found; he was without shoes, and yet his stockings were unsoiled with dust. To suppose the man died by suicide or accident, it must be believed that he arose from his bed, walked a quarter of a mile, fell or threw himself from a precipice, got up after he ceased to bleed, and walked in his stocking feet another quarter of a mile along a dusty road, to the buggy in which his body was discovered, without any dust adhering to his feet, put himself bolt upright and died! It is, therefore, very reasonably supposed that a foul midnight murder had been committed, and the body of the murdered man carefully carried, after he had ceased to bleed, and deposited in the place in which it was discovered.

NARROW ESCAPE.—The express car, with Power's "Greek Slave," ran off the track on the Mad River and Springfield, Ohio, road a few days ago. The track under the express baggage car was completely smashed up; the platform of the cars, as well as that of the next car, was also broken into flinders. The express car contained, among other boxes and boxes, Power's statue of the Greek Slave. In preservation from total destruction is considered inexplicable. It received no apparent harm. The Belgian Giant was also a passenger, and likewise survived the shock.

A YOUNG MAN SHOT.—George Thomas was shot in Albany on Sunday Evening, the 29th ult., by Jane Elizabeth Britton, the keeper of a den of infamy in John street, near Broadway. She has been arrested. In her defence, substantiated by the women of the house, she stated that the house had been attacked and stoned. Soon after this, Thomas knocked, demanded admittance, and refused to go away. She then fired. Thomas is still alive, and will probably recover.

The Albany *Evening Journal*, of the 31st ult., has the following mention of this affair:

We are happy to hear that George L. Thomas, whom we yesterday reported as having been shot, is still living, and that hopes are entertained of his recovery. Mr. Thomas is a young man who has sustained an excellent character, and whose peaceful and gentlemanly deportment has secured him hosts of friends It is evident from the testimony adduced that he was not a party to any violence to the house from which the shot was fired, and it is hoped that no fatal consequences may result from the unfortunate affair.

OLDEN TIMES.—The New York *Star*, referring to the celerity with which the returns of the elections are now received by means of express and telegraph, says:

"In olden times they were some days in making up returns which now come to us in a few hours. The returns of Westchester county, a suburb of New York, were seldom all in fifteen days after the election, and at one time they used to continue to vote, in the old eleventh ward, until Tammany went word they had enough."

CLIMAX OF BLUNDERS.—In a debate on the leather tax in 1784, in the Irish House of Commons, the Chancellor of the Exchequer, Sir John Parnell, observed with great emphasis, "that in the prosecution of the present war every man ought to give his last guinea to protect their remainder." Mr. Vandeleur stated that "however they might be, he only an leather would be generally felt by the hard-footed peasantry of Ireland." To which Sir Hercules Langrishe replied, "that it could be easily obviated by making the under leather of stuff."

City Intelligence.

COMMITTED FOR TRIAL.—The following cases were yesterday examined before Recorder Genois, and the parties accused committed for trial before the First District Court: Wm. Patteson, assault and battery on Thos. Carleton; Elizabeth Higgins, assault and battery on Alice Nugent; Sabina Gaine, assault and battery on Madaline Michel; James Gillespie and James McCormick, accused of stealing crockery from the store of Jno. Gaubebe, at the corner of Chartres and Toulouse streets, and Thomas Simpkins, accused of an assault and battery on police officer Mackey, when the latter was in the discharge of his duty.

AN OLD CHARGE STREET AFFAIR.—James Mulgrew and Harry Brooks, accused of firing into the Democratic Torch Light Procession on Saturday night, the 28th ult., at the corner of Circus and Perdido streets, was arraigned for examination yesterday before Recorder Baldwin, Col. Walton F. Bisono, Dr. Compton and Jas Dunn, all of whom were witnesses of the fray, gave their testimony, after which the Recorder announced that in consequence of the absence of the complainant, Mr. Gaines, he would postpone the examination, to continue it this morning.

VAGRANT.—Mary Walker was sent to the workhouse yesterday, for 30 days, by Recorder Baldwin, for vagrancy.

DESERTED.—Mary Sinclair, accused of receiving stolen goods in her house on Gleod st., belonging to Peter Miller, was yesterday called up for examination before Recorder Baldwin.—The prosecutor failing to appear, the case was dismissed.

HORSE AND NEGRO STEALING.—Wm. Johnson, alias Jefferson Cash, was arrested by the police of the Second Municipality on Thursday evening, having in his possession a negro, a grey mare and bay horse, all alleged to have been stolen. The negro is named Wilson, and is said to be the property of Joseph Willis, of Pelham, Grundy county, Tenn. The mare is claimed as the property of A. Bryant, of the same place. The owner of the horse is not yet known. The accused is in prison, awaiting an examination.

A TRIO OF YOUNG RASCALS.—John McCarty, Ferdinand Mogily and Frank Cash, all of them boys from 12 to 14 years of age, were yesterday brought to the First Municipality Guardhouse, having been caught in the act of carrying off a package of goods from a hack, at the corner of Orleans and Royal streets. It appears a lady had employed the hack to go shopping, and after making several purchases, stopped at the corner mentioned to buy some addition articles, and left the package containing the previous purchases in the hack The three boys came up; two of them engaged the driver in conversation, while the third went on the opposite side of the hack, opened the door and was making off with the package, when he was seen by some person, and was arrested with his accomplices.

LARCENY.—Peter, a slave of Mr. Lannoux was brought to the First Municipality guard house yesterday afternoon, charged with stealing a box of tobacco from the store of A. Black, on the Levee.

ROBBERY.—Hamilton Rowan and William Jones, accused of knocking down and attempt to rob F. Taylor, on Thursday night, were yesterday examined before Recorder Baldwin, and committed for trial before the First District Court. Bail was ordered to be sent to the work house until their trial comes on.

ROBBERY AND ATTEMPT AT MURDER.—A German named Henry Werneche was found, yesterday afternoon, in the rear of the Second Municipality, near the woods, where went in the morning to chop, lying on the ground unable to move, from the effects of some six or eight wounds inflicted with a sharp instrument, on the head and body. He was conveyed to the Charity Hospital and stated that he had been attacked by some men who robbed him of any dollars in gold and silver, and gave him the wounds. He has been roaming with three men, and charges them with the crime. One of them, named Jacob Heahn, was arrested last evening, and some five franc pieces and articles of jewelry found in his possession. On being taken to the hospital they were identified by Werneche as part of the property of which he was robbed. His wounds are so numerous and severe that he is not expected to survive.

PERJURY.—A man named Harry Wolfe was arrested by the Second Municipality police, on a charge of false swearing in giving his vote at the election on Tuesday last.

☞ A writer in the Whig *Review* tells an anecdote of a lawyer, who charged his client, among other items, "for waking in the night and thinking of his business."

EXTRAORDINARY FOSSILS.—The Burlington (Vt) *Free Press* says:

We learn that about three weeks since the workmen employed in excavating the summit cut of the Rutland Railroad, Mount Holly, discovered a fossil tooth of great size, and in a fine state of preservation. It lay in a muck pit, three or four feet below the surface of the ground, which at that point underlies the muck. The tooth is about eight inches long on its face and four or five broad, and weighs, as an informant thinks, seven or eight pounds. The color is a dark lead. The tooth was taken from the south side of the cut, near the brink.

A few days since, at the same point, on the edge of the pit, a femal horn was taken out, more than four feet long and four inches in diameter. The color is darker than that of the tooth, and both ends are decayed and gone. The surface is hard and tough, and feels like horn. The pith is brittle, easily crushed between the fingers, and unctuous to the touch. It is highly probable that more of these remains will be found at or near the spot.

I. O. O. F.—The annual return of the Grand Secretary of the Grand Lodge of the United States shows a great increase of the order in the United States. The revenue has increased ten per cent; membership, twenty-three per cent; relief, fifteen per cent; Connecticut, New York, and a part of Florida, have made no report. We take the returns of last year from these States, and add the increase as above:—Number of lodges in the United States, 1,757; initiations, 25,138; contributing members, 148,398; revenue of subordinate lodges, $1,033,267 79; paid for relief of members and widows and orphans, $345,737 46.

GEN. TAYLOR.—Gen. Taylor needs no eulogy. His life and his history are written in the history of his countrymen.

There he stands—the noble old hero—full of the calm dignity of unobtrusive greatness—enshrined in the affections of all Americans—grateful for the opportunity of upholding his country's honor in times past, and ready to sacrifice everything for her good in all time to come. She will guard his fame who has so well protected here and never leave posterity to write out justice, where she has it in her power to reward her favored servant so munificently herself. Emphatically one of the people himself, he knows that no man but one, what bears in union with theirs. He knows them—feels for them, and is one of them—and his election will be hailed with such a shout of gratulation as has never welcomed public benefactor in this country.

The *did* will grow young in his support. The mother will encourage the son to aid him—the father the child—the sister the brother. The wounded and war-worn will make his cruch help him to the polls to vote for him—and youth will grow more youthful, and beauty more beautiful in the sunshine each brings upon the hero's fame.

There he stands—calm; unmoved, self-poised, God bless him! What a pattern of a man is "an age of self!"

MAGNETIC TELEGRAPH.—*New Invention.*—The Baltimore *Clipper*, has the following account of an invention which promised to be useful:

We have been shown at the instrument factory of Mr. James Green, an improved telegraph, invented by Mr. George Mathier, of this city.—This invention mainly consists of an improvement on the receiving magnet invented by Professor Morse, by which the operator is enabled to work either one of two independent and distinct engines or machines at a distant station, using at the same time but a single wire between the two places—a result which has hitherto been supposed impossible to be obtained except by the use of two wires. One of the applications which Mr. Mathier has made of his invention is the working of two pens on Morse's instrument, by which it is enabled to write nearly twice as fast as with one pen; and instead of the alphabet consisting of dots, lines, and spaces, as used by Professor Morse, a symbolical alphabet is formed, quite as distinct and varied as the common English alphabet. There are two writing keys used, instead of letters keys; by pressing the one or both keys, the keeping of time on working by Morse's instrument is by this arrangement done away with, so that any person of ordinary capability might learn the telegraphic reading and writing in the course of a day.

Not only does this improved telegraph write twice as fast as Mr. Morse's, but we saw it working successfully with a battery so small that when one of Mr. Morse's receiving magnets, with the same quantity of multiplying wire coils, was put into the same circuit, it would not show the least sign of magnetism; neither would the same electric current suffice to mark the paper used by Mr. Bain in his Electro Chemical Telegraph; yet when Mr. Mathier threw a quantity of electricity so as to work Morse's magnet, then it readily marked the chemical paper of Mr. Bain—but then he had to restrain the force of his own magnet by a strong spring.

Mr. M. informed us that he has now working on the Baltimore and Lancaster Telegraph one of his improved receiving magnets, and that it works readily with the battery now through eight miles, yet the same magnet, fitted up on Morse's plan, with twelve coils, shows no sign of magnetism.

A PROOF THAT A MAN CAN BE HIS OWN GRANDFATHER.—There was a widow and one daughter-in-law, and a man and his son. The widow married the son, and the daughter the old gentleman. The widow was therefore mother to her husband's father, and consequently grandmother to her own husband. They had a son, to whom she was grandmother, and he was the son of a grandmother, consequently his own grandfather! This was the case with a boy at school at Norwich.—*Hood's Magazine.*

Sweet Visitors.

BY E. P. WILLIS.

My mother's voice, how often creeps
Its cadence on my lonely hours:
Like healing on the wings of sleep,
Or dew on the unconscious flowers.
I might forget her melting prayer,
While pleasure's pulse maddly fly
Not in the still, unbroken air
Her gentle tones come stealing by.
And years, the years of sin and sorrow fled,
And leaved me at my mother's knee.

The book of Nature, and its print
Of beauty on the whispering sea,
Give still to me some lineaments
Of what I have been taught to be.
My heart is harder, and perhaps
My manliness has drunk of scorn,
And there's a mildew in the hope
Of a few miserable years;
But nature's book is even yet
With all mother's lessons writ.

I have been out at eventide,
Beneath a moonlight and a star of spring,
When earth was garnished like a bird,
And night had on her silver wing;
When blossoming trees and springing grass,
And waters leaping to the light,
All that makes the pulse quick
With the kindling of the spirit, made the night—
When all was beauty, and I have I,
With friends on whom I dared to lean,
Like reeds that shake on the bank of Araby.
Gazed upon where evening's lamp is hung.

And when the beauteous spirit there
Flung over all its golden chain,
My mother's voice came on the air,
Like the light dropping of the rain,
And resting on some silver star
The spirit of a blended tone,
It's power is deep and fervent prayer
That our eternity might be—
To me in Heaven like stars at night,
And tread a living path of light.

☞ The Pope has established two telegraphic lines in his State—one from Rome to Ferrara by Ancona and Bologna, and another from Rome to Civita Vechia. A credit of 72,000f. is opened to the Minister of Public Works for the purpose.

ROME.—Amidst the revolution nothing has been heard of Ronge the enthusiast. He is preaching in Switzerland, with his usual zeal and violence. He denounces the doctrine of the Trinity, confession, the Pope, the Calender of Saints, convents, monasteries, celebacy of the clergy, and praying in foreign tongues. He goes the whole figure of reform.—*Morning Star.*

EXTRAORDINARY TROTTING.—On Friday last the celebrated horse Truxtoe trotted twenty *miles in fifty-nine minutes and thirty-five and a half seconds*, in harness, being a heat, in point of time and distance, unequalled in the sporting annals of the world. The horse was admirably handled by Col. C. S. Bartine, and many are of opinion that the success of Mr. Bridges, the owner of Truxtoe, is in much owing to the coolness, judgment and skill of Col. Bartine in the drive up to the horse. It requires his unremitting nerve to drive with a precision so striking as on this occasion; for twelve miles were done in which each mile did not vary from the other over five seconds, and many miles were exactly of the same time.—*N. Y. Tribune.*

NOBLE ENTERPRISE.—*Ohio in Africa.*—We learn that a benevolent gentleman of Cincinnati offers to Mr. David Christy, Agent of the American Colonization Society for Ohio, the sum of *two thousand dollars* for the purchase of a portion of the African coast opposite of the present limits of Liberia, to be paid as soon as the necessary arrangements are made.

His design is to offer the territory to the colored people of Indiana and Illinois, for their acceptance, upon which to establish a *new State*, in connexion with the Republic of Liberia. The Agent at Washington (the Rev. Wm. McLean) recommends that the purchase be made northwardly from Liberia, to include the Gallinas and those other "darkest dens of the slave trade." This purchase would embrace the coast between the Republic of Liberia and Sierra Leone, and forever put an end to the slave trade from that region.—*Cincinnati Gazette.*

COMMERCIAL.

The Markets.

FRIDAY EVENING, NOVEMBER 10, 1848.

COTTON—Arrived since the 3rd inst., from all sources, 29 426 bales. Cleared in the same time, for Cork, 1,985 bales; Barcelona, 1,681; Vera Cruz, 173; Boston, 5,734, and New York, 1001; together, 7,134 bales; leaving on hand, inclusive of all on shipboard not cleared this day, a stock of 104,166 bales.

STATEMENT OF COTTON.

Stock on hand Sept. 1st, 1848	bales	37,401
Arrived this week	29,426	
Arrived previously	167,473	196,899
		234,310
Exported past week	7,134	
Exported previously	122,980	130,144
Stock on hand and on shipboard		104,166

The business of the week that has just closed, opened under depressing influences. The letters by the steamer Europa, which came through by Saturday's mail, confirmed the unfavorable intelligence previously received, and the advices from New York also were of a discouraging character. It varied moreover throughout the day, and the transactions of Saturday were comparatively restricted to barely 700 bales; on Monday, a Telegraphic despatch was received containing some particulars of the accounts by the *Hibernia*, bridging seven days later advices from Liverpool, and reporting a further decline of ¼d., the quotations of Orleans Fair being reduced to 4¾d. The effect of this intelligence was to depress the market, and prices gave wayfully ¼c. The transactions amounted to 1,500 bales. The demand since has been fair and prices have assumed more steadiness, offering with considerable firmness at our reduced quotations below. The business of the last four days, embraces 2,000 bales on Tuesday; 4,500 on Wednesday; 6,300 on Thursday; and 5,000, making an aggregate for the week, of 18,000 bales. The demand has been principally for Great Britain, and the continent and the North, with a portion of the African coast opposite of the present limits of Liberia, to be paid as soon as the necessary arrangements are made.

His design is to offer the territory to the colored people of Indiana and Illinois, for their acceptance, upon which to establish a *new State*, in connexion with the Republic of Liberia. The Agent at Washington (the Rev. Wm. McLean) recommends that the purchase be made northwardly from Liberia, to include the Gallinas and those other "darkest dens of the slave trade." This purchase would embrace the coast between the Republic of Liberia and Sierra Leone, and forever put an end to the slave trade from that region.—*Cincinnati Gazette.*

The business of the week that has just closed, opened under depressing influences. The letters by the steamer Europa, which came through by Saturday's mail, confirmed the unfavorable intelligence previously received, and the advices from New York also were of a discouraging character. It varied moreover throughout the day, and the transactions of Saturday were comparatively restricted to barely 700 bales; on Monday, a Telegraphic despatch was received containing some particulars of the accounts by the *Hibernia*, bridging seven days later advices from Liverpool, and reporting a further decline of ¼d., the quotations of Orleans Fair being reduced to 4¾d. The effect of this intelligence was to depress the market, and prices gave wayfully ¼c. The transactions amounted to about 1,500 bales. The demand since has been fair and prices have assumed more steadiness, offering with considerable firmness at our reduced quotations below. The business of the last four days, embraces 2,000 bales on Tuesday; 4,500 on Wednesday; 6,300 on Thursday; and 5,000, making an aggregate for the week, of 18,000 bales. The demand has been principally for Great Britain, and the continent and the North, with a portion of the African coast opposite of the present limits of Liberia, to be paid as soon as the necessary arrangements are made.

His design is to offer the territory to the colored people of Indiana and Illinois, for their acceptance, upon which to establish a *new State*, in connexion with the Republic of Liberia. The Agent at Washington (the Rev. Wm. McLean) recommends that the purchase be made northwardly from Liberia, to include the Gallinas and those other "darkest dens of the slave trade." This purchase would embrace the coast between the Republic of Liberia and Sierra Leone, and forever put an end to the slave trade from that region.—*Cincinnati Gazette.*

A Bargain.

AN owner of three establishments in this city, wishing to close his business, in order to return to France, is anxious to find a person who would dispose of a capital of about $3,000. For the consideration of that sum he would transfer materials to an equivalent amount, and the profits of these three establishments, which have a good run, and give a clear profit of at least three thousand dollars per annum.

He could also dispose of three Slaves, having a thorough knowledge of the of business.

MUSIC ACADEMY.

MADAME ROSE, is the Lawyer Parisian Professor, respectfully has the honor to inform her friends and the citizens of this City, that having returned from her late tour in Paris he has re-commenced giving her lessons in that graceful art, in BONCHEL, corner of Bienville and Bourbon.

Mr. CLIFFORT would also inform the Ladies that coming direct from those places of fashion and elegance in the Dancing Saloons of Paris, he will be happy and proud to teach them the latest and most fashionable DANCES, WALTZES, POLKAS, &c.

During his stay in Paris, he has had the advantage of many personal interviews with the most talented Professors of the Conservatoire, Royal Academy, Bennes, Vienne, Bonner, Gimpel, Lucas and Gallenberg, who have bestowed on him peculiarly flattering testimonials of his talents and capability in teaching the science he professes.

Mr. C. will teach QUADRILLES, WALTZES, POLKAS, VALTZ A DEUX TEMPS, VALTZ A CINQ TEMPS, REDOWA, and several other late, fashionable and elegant Dances, that, as yet, have not come out in Paris, and which he hopes to show to a fashionable circle, through the means of his pupils.

Ladies desiring to learn these new Dances, can spending a morning with Mr. Clifford at the Academy, 19 CARONDELET STREET, between Canal and Common streets.

Days for Children, Monday and Thursdays.

Mr. C. will devote from four until two o'clock for private lessons to Ladies and Gentlemen. He has also been engaged by LAFAYETTE HALL, corner of Gaiety and St. Andrew streets, for the accommodation of Ladies and Children who reside in parishes Jefferson and Lafayette.

Days of attend in Lafayette, Tuesdays and Fridays.

Gentlemen are also respectfully informed that a Class will be opened for them, from 7 until 10, every evening in the week, particularly for those who wish to join Fancy Dances in a short space of time. Mr. C. engaging to teach them the waltz and Grand Quadrilles in the course of One Month, and Fancy Dances in a proportionate time.

The whole is good condition.—Delivery immediate.

A separate room could be given for the two sexes independent quite, and for the fancy stories and dance Fancy Dances.

Apply on the premises, or to

M. HUSSON, at the Citizens' Bank.

J. R. BENJE, M. Cotty Bruce, respectfully begs leave to inform the public that he keeps a STABLE at No. 87 THURSON STREET, formerly occupied by Messrs. of Brown, where he will board horses and large vehicles, and hire saddle horses and carriages at the most moderate prices. He will also sell and buy horses.
