CAUTION!!!

CHERRY PECTORAL,

Prepared from crude Cubeb, Cures of

COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA, AND CONSUMPTION.

Of all the numerous preparations (and some of them valuable) for the cure of pulmonary complaints, nothing has ever received so much and such merited praise as the effects with this Preparation. Others even sometimes, but at all times and in all diseases of the lungs and throat it has never failed to give relief, that will do it. It is pleasant to take, and perfectly safe in accordance with the directions. We do not advertise for the benefit of those who have tried it, but those who have not. Families that have known its value will not be without it, and by its timely use, they are saved from the dangerous consequences of Coughs and Colds which neglected, often lead to consumption.

The Diploma of the Massachusetts Institute was awarded to the preparation by the Board of judges in September, 1847; also, the Medals of the three great Institutes of Art, in this country, viz: the Diploma of the Ohio Institute at Cincinnati has been given to the CHERRY PECTORAL, by their Government in consideration of its extraordinary excellence and useful. ness in curing affections of the Lungs and Throat.

And the following opinion is founded on the great experience of the eminent Physician of the Port and City of Boston, Mass.

Dr. J. C. Ayer—

Five years trial of your CHERRY PECTORAL in my practice, has proved what I foresaw from the composition, that it is a valuable remedy for the lungs and throat, and that it conducates and cures the coughs and colds which so often lead to fatal and tedious illnesses.

I think it an equal has not yet been discovered, nor do I know how a better remedy can be made for the diseases of the Pulmonary Organs.

J. J. SUTTON, M. D., F. R. S.

See what it has done on a wrecked constitution, not only in the following cases, but a thousand more:

SUDBURY, Jan. 24th, 1848.

Dr Ayer: In the month of Oct. last, I was attached by a violent diarrhoea in the mines of California. I returned to San Francisco, in search of nursing in hopes of a change of climate and diet. My diarrhoea ceased, but was followed by a severe cough and much soreness, I finally started for home, but received no benefit from the voyage. My cough continued to grow worse, and when I arrived in New York, I was at once marked by my acquaintances as a victim of consumption. I immediately took your Cherry Pectoral, which I had seen my friends all believed. At this time I commenced taking your truly invaluable medicine with little expectation of deriving any benefit from its use. You would not recover these lines if I not regard it my duty to state to the afflicted, through you, that my health, in the space of eight weeks, was restored. I attribute it to the use of your CHERRY PECTORAL.

Yours truly, WILLIAM W. SMITH.

WASHINGTON, Pa., April 12, 1848.

Dear Sir: Feeling that I have been spared from a premature grave, by the blessing of Providence, and by the evidence of God, I will take the liberty to express to you my gratitude.

A cough and the shewing symptoms of Consumption had reduced me too low to leave me anything like hope, but my friends brought me a bottle of your "Cherry Pectoral" It accorded almost immediate relief, and now after several months, I feel free from my cough.

If it will do for others what it has for me, you are certainly at liberty to publish my case.

Sincerely wishing you every blessing, I am

Very respectfully yours,

JAMES C. CLARKE.

Rector of St. Peter's Church.

With such assurance and such proof, no further proof can be adduced unless it be from its effects upon trial.
