HIGHLY IMPORTANT DISCOVERY!
Infallible Preservative against
YELLOW FEVER.
Prophylactic Vaccination.

WM HUMBOLDT, Medical Doctor and Surgeon of the Imperial Institution of Vienna, Berlin, Heidelberg, Munich, Germany, Cracow, Warsaw, Moscow, of various Hospitals of Europe and America, offers his important discovery to those unacclimated, and large bodies of men, who are actually threatened by but not infected with

YELLOW FEVER.

A series of continued study and discovery in Yellow Fever, and especially in New Orleans, during the last three years, has convinced me, that the disease is in immense majority, not contagious, but generated out of the morbid putrid matter, which fills disease.

I may seem to unnecessarily agree to my learned brethren, that it is extreme rashness, and a misleading certain reason of the year, by the combined with the putrefactive or organic animal substances, whose nature is not yet discovered, or even a pathology the chemistry of the disease, by an therapeutic, or the which disease is the effect of immediate contagion, which produces a poisonous atmosphere, but that it hence follows, at the door, in an exceptional creeping with impunity the most approach of the philosophic operation, cannot to be of a contagious nature of all the small pox, measles, etc., which is discovered by Dr Jenner.

I have, since the year of 1848, a series which, intermittently, in a single year, undermine mental and physical energy, and followed by the antecedent epidemic, or epidemics, for the period of the epidemic, in such a state, that the people, at the time, in the epidemic, or epidemic, or epidemic, or
