The proprietor, in calling the attention of the public to this preparation, does so with the strong belief that it will confidence in its virtues and adaptedness to the diseases for which it is recommended.

This is a well tested article, and the fact one that has stood the test of a 15 years' trial before the American public, and has by its intrinsic merits alone, unparalled by any similar preparation extant, acquired a reputation for it, given it by the most prominent and well known men of the country, that has made it a part of the household furniture, and a certain resource of the mother, published annually by the proprietor, and to be had gratis of any of its agents, cannot but satisfy the most skeptical that it is the remedy in reality deserving the great celebrity it has obtained.
