This I certify as the whole truth by affixing my name.

## Preservation of the Sight.

MR. C. DUHAMEL, optician, No. 6, Charles street, begs leave to inform all those whose sight is defective that he has just received a fresh invoice of patent Cylindrical Glasses, approved by the most distinguished oculists in Paris, and Drs. Beard, Pomfiusou, Crawcour, Nee and others in New Orleans. The curb is such that these glasses can be used without the least danger to the weakest eyes.

The most skillful opticians have made a report declaring that the above articles are unquestionably the best for the preservation and improvement of the sight.

Their superiority over all other consists in the focus being equally divided over the whole surface, instead of being in the center only, as is the case with spectacle glasses generally. The interposition of the two cylindrical curbs makes their bodies achromatic, and consequently, much clearer than the others.

Nearsighted persons will find a great improvement in these glasses.

A pattern showing the advantages of these new glasses will be exhibited and explained, on application to Mr. Duhamel, to all those who may be desirous of being further informed on the subject. feb11
