The New Orleans Bee.

NO. 194. VOL. I.—NEW SERIES. NEW-ORLEANS, SATURDAY MORNING, AUGUST 24, 1839. VOL. XII.—WHOLE NO. 3194.

BY BULLITT, MAGNE, & CO.
No 81 CHARTRES STREET.

TERMS OF THE BEE.

SUBSCRIPTION.—Twelve Dollars for the Daily paper per annum, payable annually in advance. Ten dollars for the tri-weekly country paper, payable one year in advance, where no city reference is given. No subscription will be discontinued until arrearages are settled. In case of discontinuance, one week's notice, in writing, must be invariably given, previous to the expiration of subscription.

ADVERTISING.—One dollar per square, for the first insertion, and half that price for each subsequent one; any material alteration from the original advertisements will be charged as a new one. TEN lines or less is a square.

ADVERTISEMENTS ordered to be published at intervals, will be charged one dollar per square, for each insertion.

YEARLY ADVERTISERS.—Merchants and Traders forty dollars for English alone and 50 for both languages, Banks, Insurance Offices, and other similar public institutions, fifty dollars in English only, and 60 for both languages. Ship and steam-boat Factors or commission merchants, sixty dollars in English alone and 80 for both languages—payable yearly in advance.

The privilege of annual advertisers is limited to one square in extent, and three changes per week.

MERITED, AND OTHERWISE NOTICES.—Articles calling the attention of the public to sales of property, cards of passengers, benefits, &c. &c. will be charged one dollar per square, for the first insertion in each language.

COMMUNICATIONS or Advertisements of any personal nature, when admissible shall be charged double.—In advance.

ADVERTISEMENTS out of the direct line of business of the yearly advertisers, such as legal, auction, and plantation sales, runaway slaves, strays, annuals, &c. &c. will be charged for separately and at the ordinary rates.

ADVERTISEMENTS not specified as to time, will be published one month, and charged accordingly.

No advertisements of bankruptcies will be published in any case, unless paid for previous to insertion, or payment guaranteed by a responsible person in town.

Theatres and other places of amusement, advertising daily for the season, to be charged 100 dollars for the season, and 100 dollars extra for each language.

Sale, wholesale and retail, at the Customhouse street, New Orleans.

Those inflicted with rheumatism, scrofula, eruptions of the skin, swelling of the glands, mercurial diseases, &c. &c., may secure many advantages by applying as above.

From the attention which the proprietor has paid to the preparation of the Sarsaparilla, in its various forms, he flatters himself that he has succeeded in bringing its compound to perfection, and by using a different and more efficacious mode of preparation than that of any other manufacturer, can safely say, that he has produced an article, combined with medical properties of Sa[illegible] concentrated and [illegible] form, [illegible] combination [illegible] physicians [illegible] which it is compounded, in a concentrated form, [illegible] not be deteriorated by time, nor changed by the temperature of the atmosphere. The superiority which is claimed for this medicine over all other preparations of the kind, results from the peculiar mode in which it is prepared. We do believe we speak [illegible] when we say, that the great portion of the virtues of Sarsaparilla are dissipated or pass off in the form of vapor when subject to evaporation, or in other words, that the last mentioned is universally to a concentration of its active principles. We have been led to this conclusion from the many rejected failures which have followed the administration of this medicine when prepared according to the [illegible] and to its almost uniform success when given prepared according to the present mode. If the medicine does not arrive from, or be accounted for, on the ground that the materials have been better in some instances than in others, because we have repeatedly tried the experiment from the same article, and the result has always been, without exception as above stated. The preparation is, therefore, with great confidence, commended to physicians as a valuable addition to the materia medica, possessing in an eminent degree the tonic, alterative, and diaphoretic properties of vegetables from which it is obtained.

The time, trouble and expense which this article costs, may be urged, and perhaps with some force against its general use, but in reply we would point one word, that such objections should not weigh with the life or health of an individual is concerned.

Diseases to which it is applicable.—Scrofula, Cutaneous affections, rheumatism, and particularly those kind arising from the abuse of mercury; syphilis in primary and secondary forms; chronic and obstinate [illegible] arising from a vitiated condition of the secretions; [illegible] of the [illegible] in [illegible] or that form of disease familiarly known as Mercurial [illegible] consequently on the urine and [illegible] and urine, and, and irregularity, on the liver. We know of no remedy better calculated to remove those affections than the concentrated compound syrup of sarsaparilla.

It has now been nearly three centuries since the parilla was introduced into Europe, as a remedy several of the above diseases, by the Spaniards at the time they regarded it as a specific in venereal affections.

The sarsaparilla pills are always taken or recommended to be taken with the syrup.

These pills possess the extraordinary advantages of not containing calomel, antimony or any other medicines requiring the least confinement or alteration of diet during their judicious administration. They may be taken by persons of all ages, in all conditions and by both sexes, for any number of years, without the slightest injury to the constitution, they are therefore peculiarly adapted to persons of a sedentary or studious habit, who are confined to their chambers, and necessary to produce a healthy action in the stomach and bowels, and who are consequently obliged to have frequent recourse to relaxative medicines.

Any person affected with any of the following diseases are strongly recommended to try a bottle of the compound syrup of sarsaparilla and pills, which will be found effectual in eradicating the disease, viz. rheumatism, gout, fever and ague, cancer, leprosy, dropsy, king's evil, tetanus, consumption, dysentery, [illegible] dance, diarrhoea, jaundice, worms, stricture, mercurial disease, acidity, palsy, cholera, gripe, bilious fever, influenza or till, [illegible], diseases, whites, green sickness, [illegible] of the uterus, suppression of the menses, fainting or the womb, falling [illegible] fits, [illegible] head, asthma, liver complaints, nervous [illegible], chilblain.

[illegible] and sarsaparilla pills or blood [illegible] every respectable physician who [illegible] a retention of medicine.

[illegible] is contained in the blood.

1. Every thing in the body is derived from the blood.

2. All diseases arise from impurity in the blood.

From the blood all the solids are derived and nourished, all the other fluids are secreted and all the substances supplied to repair the waste of tissue to the body are supplied. The nutriment of the future in art, and the circulating system, it is well known provides the formation of other parts of the body and provides for some time before any trace of the system can be discovered.

As the blood is the builder up of the body and the source of general health, so it is also of universal disease; but being fluid while circulating in the body, it is more uniform in its appearance than any of the solid parts, which accounts for the difficulty of detecting an foreign or morbific matter which may be circulating with it. The miasma of fever are harmless to every other part of the system, and only become mischievous when the reach the blood; the poisonous miasma impregnated with a peculiar taint, it is wonderful to [illegible] it retains it, though [illegible] years, in even general [illegible] consumptions, [illegible] rheum, &c.

Sarsaparilla.—Read, reader, the testimonials of the virtues of sarsaparilla have been celebrated for more than two hundred years, during which time it has been in more or less repute. Every thing, however, depends upon its mode of preparation.

The highly Concentrated Compound Syrup of Sarsaparilla is a preparation from the concentrated fluid extract of sarsaparilla, and is incomparably superior to every other purporting to be made from sarsaparilla. It is manufactured by an improved chemical steam process, whereby the medical virtues only of the sarsaparilla are extracted, one bottle of which is more in strength of one dozen bottles prepared according to the formula prescribed by the London, Edinburgh and United States dispensatories. From the extraordinary virtues of this preparation, it has been introduced into all the principal hospitals throughout the United States and Europe, and is highly recommended by the physicians and surgeons of the institutions as possessing the entire virtue of the sarsaparilla in a highly concentrated form. As a testimony of the high repute in which this preparation is held by the medical faculty in general, the following gentlemen, distinguished alike for their talent and high respectability, have unanimously testified to its unrivalled merits and virtue, in curing certain diseases, for which it is recommended.—Dr. Valentine Mott, Dr. David Hosack, Dr. T. Mitchell, Dr. W. McNeven, Dr. R. T. Kissam, Dr. F. Gonzales, Dr. Watts, Dr. Alexander Hosack, Dr. Wright, Dr. Post, Dr. Delafield, Dr. Francis Bird, Dr. Physic, Dr. Chapman, Dr. Cheeseman, Dr. Jackson, Dr. Gibson, Dr. Dewey, Dr. Harz, Dr. James, Dr. Hosner, Dr. Cox, Dr. R. Rogers, Dr. David L. Rogers, Dr. Stillman, Dr. Hunt, Dr. Harris, &c.

The testimony of the above medical gentlemen, the proprietor hopes, is alone sufficient to prove its invaluable merits, as the most effectual purifier of the blood, and removator of the disease ever discovered, as well as for all constitutional diseases the system is subject to, all of which are more or less caused by the impurities of the blood and animal fluid.

The time, trouble and expense which this article costs, may be urged, and perhaps with some force against its general use, but in reply we would point one word, that such objections should not weigh with the life or health of an individual is concerned.

Diseases to which it is applicable.—Scrofula, Cutaneous affections, rheumatism, and particularly those kind arising from the abuse of mercury; syphilis in primary and secondary forms; chronic and obstinate [illegible] arising from a vitiated condition of the secretions; [illegible] of the [illegible] in [illegible] or that form of disease familiarly known as Mercurial [illegible] consequently on the urine and [illegible] and urine, and irregularity, on the liver.
