We received by yesterday's mail, via Mobile, Philadelphia papers of the 12th, New-York of the 11th, and Charleston of the 15th instant : no arrivals from Europe in any of the above ports. There was a brig in sight at New-York. in the evening of the 11th; she was not expected to bring any intelligence. A violent storm had been experienced at and about New-York; a detail of the disasters will be found in another part of our paper.

JOCKEY CLUB RACES.

The proprietor of the Jackson Course, after considerable expense for the repairs of the track, announces the regular spring races for to-morrow. We have had the opportunity of examining the horses entered for the race : for litheness of limb and beauty of form they are equal to almost any that we have ever seen. Major Bibbs' Napoleon and Marshal Ney, and Mr. F. Duplantier's Tom-Fletcher, Volcano and and the Burlington, Vt. Mail destined for Kitty-Clover, are among the finest that have as Montpelier and Boston, was upset in crossing F. Duplantier's Tom-Fletcher, Volcano and yet appeared on the New-Orleans turf. Among others there are seven or eight creole colts, sired by Mercury, Eclipse and Candidate, the best blood of the country. The races are to commence at 12 o'clock, on Wednesday; and, at the same hour, for the three ensuing days.

Protest of the United States Minister .- We have attentively perused the protest of our minister, Wm. P. Preble, at the Hague. The doc- JAMES JEFFREYS, ument is couched in manly and respectful language, and grounded on an unauthorized assumption of power on the part of the arbiter. The reason why it has been entered is not altogether conclusive. The King of the Netherlands was chosen as an umpire, and decided definitively,an acquiescence in the decision cannot consistently be withholden by either nation. A strong proof, in our mind, of the correctness of the decision, is the the dissatisfaction which it has produced between the interested parties: The have been sacrificed, while some of our Ameri- sumed at home, and 500 exported. can papers teem with loud complaints against the injustice of the arbitrage. But la chose est faite, and it is not very clear to us how the American people can protest against the award without a signal breach of courtesy, if not of justice.

New-York, Aphil 11. VIOLENT GALE. - After a thick and Murky atmosphere of several hours, accompanied with rain and a moderate breeze from the eastward, the wind changed about 9 o'clock on Friday night to WSW, and a blow commenced, which at midnight had increased to a violent gale, and continued with little variation till near night on Satuaday. During five years that we have resided in this city, we do not remember to have seen its equal for violence, except perhaps a sudden gust one Sunday afternoon, we believe in the Summer of 1829. Two or three roofs and several chimneys have been blown down, and

HEND.—'The Hallowell Advocate of Friday says:-A few days since we were invited to examine some specimens of American hemp and cordage exhibited in this town by Francis F. 300 rye, sunk at pier no. 2, E. R. with loss of Haines of Livermore. The hemp was grown in Livermore, and prepared by the machine lately erected in that place by that gentleman and others associated with him in the patriotic enterprize. The cordage was also manufactured in a rope-walk connected with the machine. This hemp was examined by numbers of our citizens, and the parcel denominated no. 1, was pronounced by good judges to be equal in all respects to the best Russian bemp. Mr. II. sold about 3 tons in this town, for the first quality of which The steamboat Nautilus, is sunk at Corlies he obtained \$210 per ton. American hemp, though equal to the foreign article, sells at a lower price, owing to the strong prejudice existing in the public mind in favor of whatever is foreign .- Boston Courier.

New kind of Inligo .- The Registro Mercantil of Manilla describes a new kind of indigo lately discovered in that Island. This plant has been long known to the natives, especially give it the name of payanguit or aranguit, and obtain a superb blue colour from it. In 1827 it attracted the attention of Pere Mata, one of the members of the economical society of Samar. He made many experiments upon it, formed it into cakes, and dyed cotton, linen and silk goods with it. - The colour he obtained was so rich, and so equal to that of indigo, that he sent some of the cakes and the dyed fabrics to the society, who di ected of her members residing in the same province to repeat Pere Mata's experiments. All obtained most satisfactory results, and they sent many of the cakes, the leaves, and even the living plants, to Manilla. A committee of merchants and chimists were appointed to ascertain. by every kind of trial, whether the colouring matter was identical with that of indigo, and might be introduced as such into the market at the same price. The committee reported in the affirmative on these points, declaring that the payanguit had all the valuable properties of the plant to which it had been compared .- Journal
