Title subscriber announces to the public, that he intends to r main in New Orleans only one menth longer. One of the most useful discoveries that has been made for nourishing, polishing and preserving all kinds of boot, shoc and harness leather, and most deserving the attention of the public, is certainly the Royal Blacking, (louisant royal.) The various compositions now in use for polishing harness, boots and shoes, have long been complained of; they cause the leather to crack and become reddish, by reason of the admixture of vitriol, spirits of wine and vinegar, in their preparation, the undersigned has, however, been so fortunate as to discover a process, that will supercede those rates a continuation of the virtue of preserving leather, but giving it the most brilliant black, and its utility is already known, particularly in France, (where Mr. L. supplied five jura to the Royal family) in England, Germany and through the United States, it has been approved of by the most eminent professors of Chemistry, who are now using it, from whom he has received about 1000 certificates. To prevent all imposition he does not intend to open any depot, but all orders addressed to him before the 25th of March next, at the corner of Hospital and Levce streets, No 2, New York Collections, will be punctually abended to. A large box containing a sufficient quantity for blacking shoes and boots for a whole year, \$2; do for carriage harness, \$3.
