The ... reached Mobile yesterday.

It is with ... that we confirm the painful intelligence of the ... on the appearance of the cholera in ... We have conversed with two persons who arrived in this city yesterday, in seven days from the island; and they have informed us that at the time of their departure, the number of daily deaths was upwards of one hundred and fifty; but the mortality generally settled on the slaves. These gentlemen, from whom we have derived our information, stated that they left Havana on account of the existence of the scourge. A few cases are reported from the interior of the island.

... and five dollar notes, issued by the western ... Philadelphia, are modest in the German language. They say "to be a profitable innovation on the banking usages, in that portion of the state of Pennsylvania, where Germans make up a large body of the population; and may probably give those notes a degree of currency in the interior, beyond that of other bank paper entitled to equal credit. We annex the formula of the ten dollar notes of the Western Bank, for the benefit of those interested, *et sapate sedentes; he translate it*, should seem that the words president and cashier have the synonimies.

The Philadelphia Chronicle of the 4th March, states that since the commencement of the first month of spring, we have had winter in its roughest form—the ground is covered with about ten inches of snow—the Delaware is almost completely filled with floating ice—and the navigation of that broad river is so much impeded, that it might as well be stopped altogether. Yesterday morning, in a self registering-thermometer in the possession of a scientific gentleman, whom we believe to be very accurate in his observations, and who makes uses any but the most perfect instruments, the Mercury stood at four above Zero. Another of our friends mentions, as the lowest mark observed by him; having ... previously, since the commencement of the present season, found the thermometer pointing to any line below sixteen.

The crew of the ship Tremont, from Boston for Batavia, mutinied on the passage out, which caused the officers to shoot Asa Smith, seaman, through the body; and two others, J. Roediner and Jos. Porter, were given up at Batavia to be sent home.

The Columbia Times appears rather dissatisfied with the summary manner in which the ordinance and laws were nullified by the state party of Charleston. He says:—"It would be worse than African, to suppose that the good citizens of Charleston alone, constitute the state; and that their resolves are the laws of the land."

The nomination of Samuel Gwinn, as receiver of public monies in one of the land offices of Mississippi, was for a third time rejected by the senate, on Wednesday last.

The following important bill will come up for consideration in the house of representatives, to-day:

Compliment to New England.—The following beautiful compliment to New England, was pronounced by the Hon. Wm. B. Shepard, of North Carolina, in the course of a speech delivered in the House of Representatives of the United States:

"Did I believe it essential to the prosperity and welfare of the Southern States, that the manufactories of the North should be leveled with the dust, it would be an unpleasant duty to vote a benefit to myself which would be the entire ruin of another. A few summers ago, while flying from the de ion of ill health, I visited New England. I found the towns and villages crowded with an industrious and enterprising population, her hills and vallies redolent with health prosperity and contentment; every mind seemed to be intent, every hand was occupied; the world does not contain a more flourishing community. There the advantages of education are extended to the poorest individuals in society, and that society receives its remuneration in his sober, industrious and economical habits. If the divine Plato were alive he would no longer draw upon his imagination for a specimen of a perfect republic; he would there find a community, in which the humblest individual had the same voice with his more wealthier neighbor, in laying the public burdens for the public welfare. I asked myself if it were possible that the prosperity of this people could be in the hot-bed production of an artificial system or rather if it were not the result of a long continued toil, of an industry that *never tires of an economy that never slept.* I looked upon the scene around me with no feelings of murmuring discontent; I felt the more rejoiced that it was a part of my country.

From Batavia.—The consul of the United States at Batavia, John Shillaber, esq. has addressed a letter to the secretary of the navy, dated September 18, in which he expresses a decided opinion, that a maritime force is necessary in the Chinese and Philippine seas, to protect the American commerce from the depredations of the pirates, who have ravaged their system of plunder. The Landrones have encreased several Chinese vessels, and it may be expected, as they gather head, and go on with impunity, that they will ere long attack American and European vessels. The crops in Java were abundant, and peace reigned throughout the Dutch possessions in India.

Discovery of important Mines in Chili.—The Araucano an official journal, contains in the No. of the 9th June, 1832, the following discovery:—

"The Intendant of the Coquimbo Serena, 7th June, 1832, to the minister of the interior:—A wonderful discovery of silver ore has been made in the mountain chain of Topiapo, called Chanarcilla and Mole. It is affirmed that the veins are immense. Since the 23d of May, sixteen, more or less rich, have been discovered; and travellers who have been upon the spot, make the number even fifty. The ore is of the purest quality, and experienced miners entertain not the smallest doubt of the richness of this discovery.

Signed JOSE MARIA PONAVENTE."

The same paper, contains the following article, dated Coquimbo, June, 1832.

"We have before us several letters frm the most respectable persons of the province, who unanimously confirm the ... discovery which we have mentioned in a preceding number. The mine lies to the south of Topiapo; it extends about fifteen feet in length, and ten in breadth; it touches the following places—Chanarcilla Rincon pan de Azucar, Zagcosales, and Mole. Chance led to the discovery by a wood-cutter, who communicated his good fortune to one Godoi and Don Miguel Gallo; they resolved to keep the secret to themselves; but certain signs and traces, which they could not conceal, soon made the matter public. Four days af or this, sixteen vein were already discovered—in the eighth day there were forty; and when the post left, fifty—not to mention the number of smaller veins or whichno notice was taken for the moment. A mass of ore, which was purchased by an Englishman for two hundred piastres, proved to be worth a thousand. Besides the prodigious quantity of the ore, it is extremely rich in quality. The intendant has sent to the minister of the interior specimens from three different veins, the analysis of which proves what is here stated; and, as if it were not enough to give that district a name by a single event of this kind, a discovery has been made of rich gold mines in the adjacent canton of Jancos; that uninhabited and desert mountain region, is at this moment animated by the presence of above 3000 people."

Haw, late sheriff of the parish of St. Landry, be and they are hereby granted an indulgence of one, two and three years, for the amount owing by them to the state as such securities; payable in equal installments, upon their giving their joint and *several* notes for the same, with good and sufficient security, to be received and approved by the district attorney of the fifth judicial district, or such other person as may be appointed by the treasurer of the state, in case the district attorney cannot act. *Provided,* That the said persons furnish the security, within sixty days from the passage of this act.
