Hearth or Narduez.—In the early part of the week, we had several severe cases of bilious and congestive fevers. For the last two or three days, we have heard of but few complaints. During the month of August, the city was unusually fice from disease, and we can see no reason to four a change.

THE WEATHER.—After three days of excessive heat we were yesterday afternoon favored with several refreshing showers, and one tortent of rain, accompanied with hall in large quantity, of the size of rife bullets. There was almost an incessant roar of thunder for upwards of an hour. The river is down to within a fuot or eighteen inches of low water. Navigation still continues up to Guyandotte and down to Louisville.

So, the Louisiana Advertiser feels a little sore. We sincerely hope a gangr ne may not ensue. We humbly con-fess our absolute distitution of such courage as this gent-men boasts of. No, we do not possess that bendit daring which would enable us to barter principles for distillations to make a trafic of the interests of our country for a few shiners, and the unparalleled effrontery to proclaim and glory in our infamy. The commission of a crime is bad enough, we all know; but we doubt if the most reckless and obdurate tenant of the Penitentiary has impudence enough to from the base of the process of defiance. That's right; brazen it out; it is the dernier resort in such esses. Ah, ha! gold has introduced him in decent company! We wonder how he will behave, for we atrongly suspect this is his debut.

With the exception of the Grenada Gazotte, which asserts that it is advisable to insist upon the immediate transfer of 20,000,000 sterling, into some immediate and less interested parties, and more secure funds than that of the British and the contract of the Briti reside parties, and more secure tongs than that of the British public, they all profess and acquisscence in the measure. So great was the crowd that ladies fainted in all directions; and the Dirictors found it necessary to close the doors against further admission, until a late hour in the day. The display was of the most splendid kind. Her Majesty had enriched the colection by a variety of work from her own hands, and those of the ladies of her circle; and, under the most gracious suspices, an immones number of beautiful and valuacious suspices, an immones number of beautiful and valuacious auspices, an immense number of beautiful and valua-ble articles had been produced throughout the kingdom of Hanover, amongst others, a rich carpet, wrongt by twenty-nine ladies, for which the sum of sixty pounds was off-red.
