Sir-It has been said and is often repeated, "happy are the sionle whose history is thesome." To take these words acording to their literal signification at this day, it would cem that Europe (Spain excepted) should enjoy in a state of absolute repose, the most complete felicity, for the eye of the observer is fair-ned in looking at the munotonous appearance in the North and the South in the Rest and the West. Not the least-provement-not the least commotion can be detected. But, think not, that the people are thereore happy in the sense in which Montesquien applied these words. None-Origana Lat. Nov. 1831. To the President and members of the City Council. GENTLEMEN,

The farming of the taxes upon rafte, flat boats and steam-hoats in front of the fautboargs Annancia ion and Lacoura, did not take place conformable to your resolutions. No one presented themselves to enhants the price, and Mr. William Barcfay, who was the purchased last year, was the only one to make an offer at \$1000, which is much less than the mi-minum fixed by you in secret/session on the 25th of last mosth. He pretends that he has suffered great losses. Per-haps you will find it necessary to reduce the som to a smaller amount, and appoint a receiver. Provisionnally I have charg-ci Mr. Pletre Aurery, inspector and cosmissary; of the up-per banism to make collections until you shall have taken measures upon the subject. In this state of things, I think it would be well to fix the commission, which he is to receive for this extra service. The farming of the taxes upon rafte, flat boats and steam

will be sold at Hewlett's Exchange coffee house of twelve o'clork,—the above lots form, squares facing Bons Enfins and Champs Elisées, promendes on the sides of Canal Marigny, where the rail road stands. A brief statement of the advantageous changes the have taken place since a few years in that quarter, and

The principal improvements are the rail road: the New Leven Steam Cutton Press; the splendid paper manufactory and many large blocks of buildings, the river filling up avery year with mud the part in the upper part of the city. The foreign commerce is thereby forced down and crowded on this point; and vast undertakings are equiemploting by the population of their section, who do enjoy real wealth, and when energy and capacity have been beely brought to test, have little

doubt concerning their completion.

The buildings which they are about to erect on that part of the old square of the city, immediately below the regetable market, and will affind commodities to commerce, of which it had been deprived up to this day, it cannot but increase on this point and in the
