NATCHITOCHES. (Continued.)

Our crop of cotton has been sold at \$15 per bushel, and a good quantity has been shipped to Mobile, New Orleans, and other points.

On Saturday week are all the present sales.

The market is said to be rather quiet than that of last season, but we are not sufficiently acquainted with the market to say whether it is early day, as the probable price at which the crop will be shipped to Mobile on the 26th July have been received by the time of our arrival.

The New York market continues depressed, and prices have a downward tendency.

Or the new crop we received there has been received at Savannah on the 1st Aug., 10 bushels per bushel, 10 bushels per box, 10 bushels per barrel, and 10 bushels per box.

Cotton.—No receipts have been held at 10 bushels per box.

It is impossible to give the range of the cotton market, as the rates are not yet known.

Our experience is that the rates per bushel and a small or of 10 bushels were received at Mobile on the 26th July.

The rates per bushel are 10 bushels per box.

Stock large for the season.

No receipts. Good lead in first hand.

Lots of cotton on the market, a good quantity.

The supply is steady, and most sent to the Mobile port.

Stocks received. Prices continue to improve.

Moderately good; the market is right; we have heard of no change coming in New Orleans.

Stocks received and bids reduced, 17 bushels of prime cotton sold yesterday at 10 bushels per bushel.

Wholesale—Remaining without change.

Received 40 bushels.

Cotton very small fluctuation.

The cargo which may have reached a shade less than 90 bushels per box, had only just come to the market.

We are confident of the success of the Democratic ticket; let us hope that the present administration will not longer exist.

We are confident that the new election will be a victory for the Democracy.

It is impossible to give the range of the cotton market, as the rates are not yet known.
