BOSTON, Nov 11. BOSTON, Nov II.

Since our last publication the presence in the money marked has been as great if not greater than at any previous time, and probably felt mere in the commercial community. The result has been a complete suspeasion of all large transactions in merchandizm. The regular rates paid for good are 11-2 per cent per mount and spowards. Banks discount little or none. Most goods that are usually sold for cash, have rapidly declined, and been difficult of sale. Exchange on England is very searce—the principal sales for cash bills have been 84 per cent premium—some have sold higher some lower.

We feel gratified at this result. Louisiana, as a southern state, should rejoice at it. For, it is now palbable, that the south has escaped one of the worst schemes that fanaticism ever designed. Mr Harrison and Francis Granger, the former tending towards the abolition of slavery, and the latter its avowed advocate, would have been the President and Vice President, without the success of Mr Van Buren. A most aboniwithout the success of Mry an Curen. A most about-isable coalition has been entered into, between the nullifiers and the abolitionists, having in view the de-struction of our hallowed union. Every souther would have been forced, by the exigency of circumstances, to have become a nullifier, in order to save the country from the horrors of abolition. But thanks to an overruling providence, thanks to the vigilance of a virtuous people, the integrity of the union is preserved; and these two exciting subjects, abolition and the U States bank, are consigned to eternal obloquy and disgrace.
The present ranks as a proud epoch in our country's

history; and glad are we to say, that Louisiana knew her duty, and dutifully discharged it.

They seem to entertain every sposition to transact business with us; and we reciprocate this desire with them, as well as with other nations. It were imprudent in them to attempt to em-harrase our fiscal intercourse; for they will be as great losers, if not greater, by the recent proceedings of the Bank of England. The Bank of the United States, of Pennsylvania, was deeply interested in the result of the late presidential election, and of course, to ik a decided end inflaential part in it. No wonder, then, the democrate of Pennsylvania, and all the states in the vicinity, have had fierce and obstinate enemy to contend with. Every man, woman and and child, who was concerned in the stock of the bank directly or indirectly, was necessarily interested in the cause of the bank whige; we are surprised more that the democrats have been successful at all, than that the contest has been so close and settingly urged by the bank party. It appears, that at New York, on the 8th instant, U.8 Bank stock was sold at 116, being a rise on the highest seles of the previous day. This was the consequence of the false news circulated relative to the pretended victory of the bank party in Pennsylvania.
