municipal elections, is that which provides for the division of the wards into districts and fishits the election to one day. The law in question is one of the wisest and most satisfactory passed by a legislature. By dividing the city into numerous election districts, every legal voter will be enabled to denote him and most satisfactory. ing the balloting to a single day -all the drunke by lishting the balloting to a single day—all the drunken-ness and debauchery, the shameless corruption, the excite-ment, rowdy ism and broils which fix's been the almost in-variably concommants of elections in New York will be of-fectually avoided. The other provisions, such as the re-gistry of a,mos, the election of judges, the representation of the minority in the board of inspectors, &c., are equally, sage and wail derised. The New Verker, a strictly neutra-paper, states that the bill has been so wisely and carefully iramed, that not one hundred illegal vote can be taken, nor one hundred legal voters deprived of their right in the whole city, at any election that may be held under its pro-risons.

Tisona.

The outcry of the locofocos against this excellent law, and their ridiculous threats of nullification and secassion establish their fears of the result of a unwitted franchise and prove them to be the greatest hypocrities on earth-for it is not four years since they were clamorous for the very measures which they, now so unqualifiedly denounce. The principal mean of the Albany Regency were all engel for the passage of a registry law. They have it, now, andecry a only because, under its salutary anfeguard, perjury and illegal vesing cannot be practised with impunity.
