The Senate have spent as much time in legislating against the banks of this devoted district of Columbia as would have sufficed to prepare and mature the d

By the proceedings and votes of last night, the bill was, after a sitting of ten hours, brought exactly to the condition in which it came originally from the house, namely, continuing the corporate existence of the banks for two years, and giving them for that time all banking powers, on condition that they should resume spacie payments within 96 days. Having got it into this shape, the federal locofocus began furthwith to make it as bad as possible by a new set of it into the shape, we meet a necessary members began certa-with to make it as bed as possible by a new set of "amendments." In vain did the underpendent members protest, and remonatriat against this unjust course. In vain did they ask to hear the svidence—in vafa did they solicit that the claimants thus summanily to be outset should be heard, in their own defence, at the bar of the house.
