MR. VAN BUREN IN 1812.

Mr. Van Buren made common cause with the fed-ralists, in 1812, to oppose the war with England; and to sewerfully anathrined De Witt Clinton, the cand ate whom the "peace part"—in other words, the fed ralists opposed to the democratic candidate. Mr Madison.

the convention, in order that I might be enabled to send you copies.

In addition to this, I transmitted to you such documents and speeches as I supposed would promote the Democratic cases in Tennewice. Things appeared to go on very well until the 14th of June, when Mr. Botts, of Virginia, presented to Congress the memorial of Lisustenant Hooe, of the Navy, protesting against the testimony of two negroes, who had been introduced as evidence against him on his trial before a court martial recently held at Pensacola. After I had examined the case most carefully, in which it seems the Secretary of the Navy, the Attorney General, and the President of the U. S. all concurred in opinion, it struck me that perhaps the President had been misrepresented. This decision involves at once the great principle for which the South is contending, and on which the President's popularity is founded. I therefore, determined to call on him founded.

REASONS FOR CHANGE

The following are the plain spoken reasons given by Wm. H. Gray, Esp., editor of the Statesman published at Vevsy, in Ladians, for having abandon ed his former association with the Van Buren party to lend his sid to the cause of Harrhoon and reform:

ed his former associations with the Van Bures parry, to lend his aid to the cause of Harrison and reform:

As we have been somewhat associated with the Van Bures parry, to lend his aid to the cause of Harrison and reform:

TO THE FUBLIC.

As we have been somewhat associated with the Van Bures parry, for some years past, it may occasion some little surprise, affected or real, in certain quarters, on seeing our name at the head of this paper.

A preper deference, therefore, to our former associates, compels us to frankly state that we have abandoned the support of the present administration, not because we are tired, and the surprise, and the surprise of the great mans of homest men with whom we have heretofore acted, but because we are tired, singuisted, and even alarmed at the anti-democratic and dangersus practices of those who enjoy the confidence of that parry: because we can no longer support an administration of cerruption whose practices are noteriously at war with its professions, and whose pernicious influence, like the paisonous breath of the sirocco, in now sweeping over the length and breadth of this land, carrying moral death and destruction is its onward course!—an administration which, in the sirocco, in now sweeping over the length and breadth of this land, carrying moral death and destruction is its onward course!—an administration which, in the outset, laid down economy and the integrity of public functionaries, the modern democratic principles that the public expenditures have been almost trebled; and, instead of integrity anough public functionaries, the modern democratic principle that to the "victors belong the spoils," and the eccupulous exactness with which Mr. Van Buren carries it out, has rendered the tens of thousands of offices within the gift of the president as merely see many means where with to reward partisen services; thus openly encouraging political and meral deprayity, and proclaiming to the world that, in this enlightened and christian republic, vensity and party unberviency
