PLATINA CEMENT

DR. ACHILLE LEFE, Dentist of the Faculty of Paris, after many researches, has discovered this valuable composition, which he applies with the utmost success in stopping decayed teeth, and preserving carious ones. The composition of the Platina Cement, which is entirely mineral, is inexpressible; it is used cold, almost in a liquid state, and speedily acquires the hardness and consistency of the enamel of the tooth when in its purity. It will last for many years, not only as a preservative of the tooth, but also to render sensible teeth insensible.

DR. WRIGHT'S ASIATIC TOOTH WASH, a new important discovery for cleansing the mouth and teeth from the tooth ache. This liquid has the properties of preserving from the tooth all the deposites from the saliva without injury to the enamel, which it leaves white and beautiful.

It cures the quarry, strengthening and hardening the gums, causing them to adhere closely to the teeth, whereby the tooth becomes rendered firm in their sockets, and imparts to the breath an agreeable odor.

It can be obtained at the store of Messrs. Hyde & Good rich, 18 Chartres street.
