JOHN MCCARTY, PLEMBER,

Tuesday merning, Oct. 12, 1846. To the Subscribers of the Bec. As many of our Subscribers and

particularly those who are annual advertisers, have their places of business at a considerable distance from the Office of the BEE, we have been induced to establish for their convenince, a Publishing Office, at No. 13, amp Street, near the City Bank. Advertisements for the Paper may be left there until 8 o'clock P. M., and will receive prompt attention.

Nothing could have been more opportue for the salling fortunes of Locofocoism, than the recent rise in the price of bread stuffs in Europe, and the inreased demand for the agricultural produce of this ountry, and accordingly we find the party presses, with their wonted blindness to facts, or recklessness of candor, every where asserting that this promise of d candor, every where asserting that this promise of short lived prosperity, is the natural effect of the resolution of the tariff and an inevitable corollary from the principles of free trade. They forget that the Tariff of 1846 has not even yet gone into operation, and unscrupplously attribute to its passage, results which flow from disaster and blight in the Eastern Hemischberg.

the conclusions of Locofocoism than the fact that while the free trade party in this country are in costs. sea at discovering a profitable market for American produce, and ascribe the opening of that market exlusively to the adoption of a system of revenue duuence of the repeal of the corn laws, are assounder and aghast at the failure of their prophecies. The ame party in both countries undertook to forestandow he result—one went for cheap bread and the other for the result—one went for cheap bread and the other for fear hread. Circumstances have fulfilled the predic-tions of the latter and they straightway impute a for-unious event to the immutable theories of Free Frade. Causes over which human legislation has no ontrol -the changes of the seasons, fluctuations of emperature, and those mysterious dispensations by wheat and Indian corn, augmented the value of these articles—and yet politicians have so little honesty, or England the opponeuts of Free Trade are exulting the famine and overwhelming their antagonial with reproach, while in the United States the cham onth reproach, while in the Onnea States in common of the New Tariff are coolly laying to the score of that financial panacea all the advantages present

Atrophy and famine—not the Tariff—have ated the agricultural market. The potato rot is freland has necessitated a supply of Indian corn, and comparative failure of the wheat crops in Europ as imparted activity to the flour trade. The people the Eastern Hemisphere must have bread, and hey cannot get it at home, they must import it from throad. With as much reason might it be said that otton has risen in value on account of the Tariff.xplain the increased price of that simple, just as as Apain the markaged piece of that maple, join as a salactorily as the blighting influence of the potate there is, accounts for the high price of food.

Boston Bank Dividends.—The Semi-annual dividetails of 25 of the Boston Banks were to be paid on the 5th. Of these, we observe that 14 Banks pay 3

per cent; 5 Banks pay 3 1-2 per cent; 5 Banks pay 4 per cent; 5 Banks pay 3 1-2 per cent; 5 Banks pay 4 per cent, and the Boylston Bank, which went into operation as the close of last December, pays 5 per cent. The aggregate banking capital is \$18,180,000, and the aggregate half yearly dividend is \$602,000.

CRUISE OF THE CONSTITUTION.—This favorite ship, whose arrival at Boston a few days since was duly noted, was alseed roughly.

by copious Telegraphic abstract: we subjoin a number of interesting details, for which we are indebted to the Boston Adaz extra:

The Sason and Tax Caors.—The summer of that desoon has been one of the most brillian that we bare, the state of the Boston base been one of the most brillian that we bare, the corn crops are deficient, with the exception of the what, which is always improved by he to wester, the corn crops are deficient, with the exception of the what, which is always improved by he wester, and the corn crops are deficient, with the exception of the what, which is always improved by he wester, and the corn crops are deficient, with the exception of the what, which is always improved by he wester, and the corn crops are deficient, with the exception of the what, which is always improved by he wester, and the corn crops are deficient, with the exception of the what, which is always improved by he wester, and the corn crops are deficient, with the exception of the what, which is always improved by he went of the corn crops are deficient, with the exception of the what, which is always improved by he went of the corn crops are deficient in the middle of the corn crops are deficient and the corn crops are deficient in the middle of the corn crops are deficient in the middle of the corn crops are deficient and the corn crops a

"Then, if we turn from our prospects abroad to those at home, we do not find matters very much improved. The wheat crop, though not so abundant as was expected, us, no doubt, the best in Europe; just at its the only crop which, taking all parts of the United Kingdon, must not be pronounced a failure. The spring crops of grain, bats, barley, beans and peas, as a whole, are deficient to a consecrable extent: the point may be called a total failure, said especially in Freland and Scolland. It is impossible, then, as regardas large portion of the population, but that great suffering must be experienced, and mach difficulty in iobinising the bare increasance of life, which must, as a matter of course, materially limit the demand for other articles of a less argent necessaries to severally. With these facile before as, it would not be wise to overlook the necessary influence which they must exercise over our trade for the next year; and, as regards the staple trade of the neighborhood, it is a matter also greatly to be regretted, that there are some well grounded apprehensions of a higher price of the raw material, which will actionally agravate any difficulty which may arise from the causes we have enamerated. We are not alarminist; but at such a moment, with so many indications of denger ahead, we should neglect a grave duty, if we did not place them before our readers in the true light in which they present themselves to us, in the hope that timely precation may mitigate the evil."

Bark or Eurotann.—The present amount issued by the Bank, including the seven day biths, is 220,596 [700] of which only £21,465,605 are in circulation, leaving in the Banking Department £2,923,1955, one half of which would be sufficient for its peneral purposes; but agreed to the public, and not likely to make the Bank a profitable concern to the proprietary, the directors can only make it eb by uncreased abov

From France the chief item of interest is the Montpensier marriage. On the Bourse it is thought that Great Britain will acquisee and that Louis Philtippe is too shrewd a politician to have acted in the premises, without being certain of this. The opposi-tion presses denounce the marriage as disadvanta-geous to French interests.
