HARRIBUDE, Aug. 21.

The Democratic Convention of Lebanon county, have declared the Heri. Jan. Bughanan their first choice for the Presidency.

LATER FROM MEXICO. By an arrival from Vera Cruz, we have re-ceived files of spers to the 6th, and from the city of Mexicolto the 2d inst inclusive, being four days later. The journals do not contain such intelligence of interest. The financial

pets submitted for providing for the foreign debt, appear to absorb public attention, and create an infinite deal of controversy. The plin proposed by the Minister of Finance, Senor Pina y Cuevas, of which we published Republicano—the leading paper in the Capital—attacks it with ability and seal. In the meanwhile nothing positive has been effected. On the 30th and 31st July, the Chamber of Department of the State of Deputies was unable to proceed to business, for want of a quorum. The Monitor lays the blame

The elections throughout the Republic were the elections throughout the republic were to take place on the 3d inst. The papers anticipate the triumph of the liberal party.

A large amount of spurious coin has been put n circulation in San Luis Potosi.

Don Bernado Conto has been chosen Presi-Inally nominated for re-election as the soft of the Senate and Don Juan de Navarro, vice Presidents for the month of August. In the Chamber of Deputies, Sanor Gomez Fairar, and Hawky W. Cosman (Aboltton.) was elected President, and Senar Gabriel Sanorar proceedings are as follows: he subject of slavery.
In Darango, on the 17th ult., a popular com-

to the Clerk of the steamer A. D. Bacon, for a file of St. Louis papers to the 25 h inclusive. We are infromed that the steamer will leave on Tuesday next.

Cross in Alabama.—The Mobile Tribune of Thursday, has the following: The Sumter Democrat of the 23d, says that the crops in that country "are a subject of gloomy reflection." The cotton cop, it is leared, will be thorstend at least a third. For adequate supplies of corn, it says the people will have to look to the ways the people will have to look to the ways the prospect for a crop of cotton grows more cloomy every day. The late reans, instead of being beneficial, have produced the rust. The crop of its region, it says, will not be so large at it was laby year—which was a short crop.

Searcely any corn will be made, in comparison with previous crops.

The same paper says that water is so scarce in the country, that some planters, who live item and eight miles from rivers are hashing it benefic to their plantations.

A large meeting was held at Carrollton on he 16th instant to provide corn for the deficienty of that staple in Pickens country. It adopted resolutions to the effect that the commission-recount of the country raise lands by plending he faith of the country. This loan to be readily the sale of the corn purchased by these, said by the sale of the corn purchased by these, can't be sale of the season state of the country is and that the vote of the season of the country or hat shance to be ready to the same season of the country or hat shance to the country of the country of the country of the country raise lands of the country or that shance to be ready to the season of the country or that the not not season all dended to be readily the sale of the country or that the not not season all dended to the country or that they not not season all dended to the country.

We think that no one can dended the the orn crop of Pickens has fellen short.

HARRIESURO, Aug. 21.

LATER FROM THE PLAINS. LATER FROM THE FLAIMS.
The Si. Louis Republican has received later interesting news from the Plains. Mr. Thoms:
Buteman, and ien others, arrived at Kanesville on the 13th, from the Great Salt Lake City.— As they traveled with ox teams, and were nearly two mouths on the routs, the news from the City itself is no later than we received two

nearly two moeths on the route, the news from plu City itself is no later than we received two weeks ago.

Mr. B. met Orson Hyde and company 108 miles this side of Fort Laramie. He brought a letter from Mr. Hyde, to Mr. Mackintosh, of Kanesville, dated the 22d July, in which he gives an account of an adventure with the Indiana. On the 11th, near one branch of the Loup Fork of the Platte, his party was assailed by a party of about 200 Pewmee Indiana, and robbed of between seven and ten hundred dolinars. There were only seven of the Mormons in company. Mr. Hyde lost eighty dollars worth of clothing; gun, camp furniture and provisions, besides his horse Jim, which he atterwards recovered by paying \$40 for him. At the time of writing, they were all in good health and spirits. Captain Smith's "three fifties" were not robbed by the Indiana, as they had passed before they had taken their position on it e route. Mr. Hyde says that he is satified that there is a concerted plan batween the Omahas backed out from the arrangement.—Orson Prati loss in horses after crossing the Miscouri river, at Winter Quatters; he sapposes that the Omahas stole them. They experienced only one rain storm, but this was a severe one.

one.

Another istter from Mr. Crombie, states, that Judge Broechus. Mr. William 11. Gooch and Mr. Walker, shared Mr. Hyde's fate. The report is, that they were robbed of all their clothing, except pantaloons and shirts. Mr. Crombie killed a fine horse in making his escape from the Indians.

portie, that they were robbed of all their clothing, except pantalone and shirts. Mr. Crombie killed a fine horse in making his secape from the Indiana.

Mr. Bateman met several California companies, two dear travel from Shi Lake City-all ceiting along wall. He met Mr. Babbitt and a number of Gostin. He met Mr. Babbitt and a number of Gostin. He met Mr. Babbitt and a number of Gostin He met Mr. Babbitt and ceiting along wall. He met Mr. Babbitt and company dear the other side of Fort Larame, progressing without moistation. Their aminals much jaded. Causan Stephens' company was met about three hundred and filty miles out, proceeding without moistation. There was a company of about three hundred wagons in the Sand Hills, where Mr. Hyde was attacked, and fear were rotestained for their safety, as the Pawnee Indiana were known to be in force in that vicinity. John Brown's company of emigranis was met at the jonetion of the new road, two hundred and forty miles from Winter Quarters, 28th July, exting along well.

The First Annirataron.—In the Rutherfordion N. C., Mountain Braner there appears an allegation (the truth of which the Banner has no reason to doubt! from Dr. W. A. Graliam, now of McDwell county, to the effect that he was the first that made the discovery how to apply, practically, exabonic gas to extinguish desiractive fire of fishes. Dr. Graham claims the invention as lar hack as 1837, in November of which year he first that made the discovery how to apply, practically, exploning gas production and cavear, which, he astee, still remains in the Fatent Office at Washington. The Doctor announces has intention of repairing to thacty upon the meeting of the next Congress, to renew his application for a patent, which, it anears, was refused by the Fatent Office in 1837, on account of the invention being stated not to posses that novelty which would justify the office in issuing one, and doubt stating as to its being capable of being extred into effect. According to Dr. Graham's statement. Mr. Calbonin brought

Francisco and back to Baltimore in the unpre-cedentedly short space of two hundred and one

Grant Engineering Office Services.

ROCHESTER, Wednesdey, Aug. 20, 1851.
GRAND ENCAMPRENT OF ODD FET.LOWS — The election in the Grand Encampment last evening, resulted in the choice of S. Miles, of linates, for Partirarch; A. A. Van Norst, of Schenectady, High Priest; R. F. Russell, of Cavaga, Representative; W. H. Prail, of New York, Scribe; Henry D. Aeray, of Albany, Senior Warden; Joseph Seymon, of Onondaga, Junior, Warden.

Boston, Aug. 20.

The steamship Furono Carol, Lett. and Carolinates.

The steamship Europa, Capt. Lott, sailed to-day, at noon. She takes our 25 passengers for Liverpool, and 10 to Hailaz.

Among the former are G. A. Peck and Henry Hardt, of New York, J. Kennedy, of Havana, Mr. Linsley of New Orleans and H. Little.

The Cholera are Rapides.—The Red River Republic in of the 23d instant, says:

The Cholera was abasing at Mr. Cothoun's at the last seconds.

But one new case had occurred in several days, and nearly all the sick had got well or were convalencing. We have not heard that the disease has spread to any of the adjoining places.

The number of deaths at Cothoun's is various-ity estimated—some put it down as 50, some at 50 and some at upwards of 70. It certainly was of a very virulent form at first. One overseer and one doctor, died of it. Of the other first Physicians who were called in, three were attacked, one of whom came very near dying.

Sea Sickrew.—At a late meeting of the

British Association, a paper was read by Mr. J. Arkinson, "On sea-scheres, and a new remedy for its prevention," from which we make the following extract. If it should succeed it is certainly an easy remedy:

"Let a person on shipboard, when the veasel is bounding over the waves, seat himself, and take hold of a tembler nearly filled with water or liquid, and at the same time make an effort to prevent the liquid from remning over, by keeping the most of the glass herizontal, or nearly so. When doing this, from the motion of the vessel, his hand aftd arm will seem to be drawn into different positions, as if the glass were sufracted by a powerful magnet. Continuing his efforts to keep the mouth of the glass were sufracted by a powerful magnet, and hold by the properties of the properties, throwing a quoid, &c... which they will be imposled, without taigue, almost irresuntibly to perform; and he will find that this has the effect of preventing the gliddiness and nauces that the folling and tossing of the vessel have a tendency to produce in inexperienced volvagers.

"If the person is suffering from sickness at the commencement of the experiment, as soon and he grass the glass of liquid in his hand, and suffers his arm to take its course and go through thequive-ment alliaded to, he feels as if he were performing them of his own free will—and, the nation abster misselately, and very soon cease entirely, and does not reserve Should be, however, resix the free course of his hand, he instantly foots a thrill of pain, of a piculiar sunning kind, shoot through he head, and experience a sense of direction and efforming visited through the cerrity and sease the sense of he hand, he instantly foots a thrill of pain, of a piculiar sunning kind, effort through the cerrity and sease the sense of he hand, he instantly foots a thrill of pain, of a piculiar sunning kind, effort through the cerrity and the properties and a before and commence of he some of heads of the residence of heroscie and abdominal visitera: and he is of opi

to cell at good prices in Desember and factors, who reduced to cell at good prices in Desember and January. Having thus briefly reviewed the past, we shall content ourselves with mying only a word or two about the fatter. The great full is Cotton, and the return to a tow range of prices, has bed the effect of powerfully minutating consumption, and according ly, we find that during the p st two months both spinners and manufacturers have been making beary purchases in Liverpol, noter the influence of which, the market has advanced 3'd from the low-nest point. On the Continent of Europe, things are also improving, and we have reason to believe that our own manufacturers have good to the present reasonable resea, are generate to expect their operations. Indeed, from all accounts, it would appear that on far and from fitting in concerned, the present rate of consumption exceeds stything before known. It is reasonable therefore to expect, that unless any madden influent takes pince is prices—and we see no assue to anticipate such an occurrence—a steady and rapid instead will be made in a resting stocks, thus placing the Trade in a position to work off the meat crop, however layer it may prove to be.

The extent of apply in accommentily involves the fate of the market, and public opinion—nonsetimes, a

thus pleating the Trade in a position to work off the next crop, however layer it may prove to be.

The catent of supply accessarily involves the late of the market, and public opinion—sometimes at fault, witches last year—public to the probability of the largest crup on record. Some parties even have ventured to indelige in extinates, speaking sixty of 37 or 3,00,000 but of course, any one who undertakes to reduce an opinion to figures on the lat Reptember, will be looked upon by at leanistic fiche as not grided with a surplussage of brains. It remains for us simply to state what are the facts. The largest crop sever produced in the United States, was about 3,500,000 bales, for although during the exaces in question, the receipts at all the perts reached 5,700,000, yet it lewell anown that nearly \$00,000 bales of the previous pass's growth were thrown in. How far the country has since increased its capacity, our readers probably know fully as well as ourselves. Doubtlees a very large quantity of new lands have bree opened, but on the other hand, old lands which have been in cultivation for the last twenty or thirty years, may be expected to have lost come of their productiveness. The increase in force has not kept pace with the previous annual addition, owing principally to the razages of the cholorus, but since the large crop year in quantion, it is obvious that the large crop year in quantion, it is obvious that the habitity to rave a larger crop actually exists. Up to within two months ago, the prospects for the shoop printened drought. It is mid that the plant has suffered severely on the highlands which, but transce, brave been very general, in consequence of the rargeriller.

It is uncleas to indulge in any cardificant argument at the green most luturitiest. Rains have set inoffate, but it is to the faced that they will do more harm than good. We have an accounts a yet of the appearance of the rargeriller.

It is uncleas to indulge in any cardifional argument and year, for as so man will be superized to
