It will be re-I that two years singe this young lady ed to the association a beautiful flig we be ave by her own for hands. command the followings of the day we at the reflects great credit on the city

By the arrival of the schooner Robert Spedn, Captain Radovich, we have received our es from Vera Cruz to the 22d and from the try of Mexico to the 16th August, inclusive. The most important item of intelligence in the

store of Vera Croz imposing a special tax on the citizens of that State, who, by all accounts, were aircady grievously assessed. Greati dis-content followed, and on the 21st August, a number of citizens assembled before the Counril room and demanded the repeal of the obnox-ious statute. The members assured the perple that they had no authority in the matter, and hat it belonged to the State Legislature; but the ignorant and excited crowd paid no atten-tion to these explanations. A company of the National Guard was sent for, which succeeded in dispersing the citizens. The latter retired and armed themselves. Soon after, a collision took face between a party of the rioters and the ime being; the National Guard, on the or

hand, affiliating with the people and decla-ring they would support them against the military, and the Council, on the other, promisi not the repeal of the law. The papers say hat at the latest dates all was quiet. The Ec del Commercio states that three persons were k lled and ten or twelve wounded, and the officers of the Hobert Spedden report that when they left, popular feeling ran very high, and another outbreak was expected.

In looking over our files of Mexican papers,

e are struck with the indications of disorder and weakness in the Government which they veal. Nothing has yet been accomplished or the settlement of the debt, either foreign or domestic. The most influential presses utter othing but denunciation and invective against Senor Pina y Cuevas. The Mexican Congress is half the time without a quorum, and the other balf, engaged in frivolous discussions which lead to no practical object. We perceive that a new project for the arrangement of the domestic debt has been submitted by the committees on finance.

the 29th. The despatch to the Dolta says:

Livenyool, August 16th.

There has been a good inquiry in the Cotton market during the week, generally at firm rates, though, except for small quentities of American, there has been no actual advance. The quotations for Fair Orleans remain at 5.2 4d., while Middling Orleans we quote at 45.8 4.3-4. The sales of the tweek embrace 47.000 bales, of which were taken for export, 10.500, and for speculation, 7.800. The importance the departure of the Canada are 19.700 bales. Flour has declined 6d, to is, per bbl., and Corn 18, per quarter-yellow is now quoted at 25s. 6d, to 25s. Pork is scarce, but without improvement in prices. Bacon is in request at full prices.

gien of last Monday. We give it for what it is worth:

By the arrival of the St. Matthews, from Florids, we are rejoiced to learn of the safety of the Pampero, and a number of the particulars of the Earnell Lopez, from the time of his departure from New Orleans, to his final landing at Shaia Honda, his pulse lateral to expedition of General Lopez, from the time of the St. Near there ask termained to everal days, for the purpose of evading the vigilance of the Spanish ships. Having learned from the K-y West wreckers, that the inhabitants of the district of Veets Abajo (nearly opposite Key West) were ap in agus, (ien. Lopez determined to avail himself of this information, and make his landing among them. Sterring for Blaha Honda, his purpose was to land at a leagues from Havena, the machinery of the Sampero got out of order—the consequence of the Spanish Honda, his purpose was to land at a leagues from Havena, the machinery of the which was, that she flored the consequence of the spanish towards that city:

By the arrival of the St. Matthews, from the was a land at a many to the solid propose of evading the white towards that city:

By the arrival of the St. Matthews, from the was a land at a many to the solid propose of evading the white towards that city:

By the arrival of the St. Matthews, from the was a land at a many to the solid propose of evading the white towards that city:

By the arrival of the solid propose of evading the current of the purpose of evading the white towards that city:

By the stription of General Lopez of the solid propose of the St. The Pampero poroached within its propose of the St. The Pampero poroached within fifty yards of the solid propose of the St. The Pampero approached within its good in me I owe to my mother."

The Pampero and a number of the safety of the solid propose of the St. The Pampero and a number of the solid propose of the St. The Pampero and the solid propose of the St. The Pampero and the solid propose of the St. The Pampero and the solid propose of the St. The P

coasting vessel, from which Gen. Lopez obtain-cd we pilots.

The Fampero approached within fifty yards of the coast, when a landing was made without difficulty.

Lopez and his courades were received by the inhabitant [sho congregat in great number] with open arms, agd indeed with every demonstration of favor. The planters brought forth fruits and provisions of all kinds—and soon a large part of Lopez force was mounted on horse, the voluntary offerings of the people.

The Fampero having remained all night, left for Key West the next morning, nearly destitute of coal. Her want of fuel accounts for her not having been earlier beard from. She is now in a pesition of safety.

We will only add that we have these particulars from one who was on board the worlden. From the Richmond Whig.
THE CHIVALRY ALARMED - We have rarely

seen anything more supremely ridiculous than the following, which we find in the Charleston Mercury of the 14th instant. When children exhibit signs of fear at the approach of imaginary goblins, their tender years and helpless condi tion must usually excite sympathy. But when grown men, and they the boasted Chivalry. tremble at shadows, it is impossible that such childishness can excite other feetings but those

capacity for self-government. Penns and feneron cannot be converted into republican freemen.

The meeting of the Governors of the several States of Mexico was to have taken place on the Leth, most of these functionaries had reached the capital.

The elections are said, thus far, to have tested tavorably to the Government.

The cholera still rages at various points. It has been extremely fast at Caliscan, killed 450 persons in three days, out of a population of some 5,000.

The begin of the pike however is yet in come in the Mexico of the pike however is yet in come in the Mexico of the pike however is yet in come in the Mexico of the pike however is yet in come in the Mexico of the senting of the senting of the senting of the senting who happened to be a faw recruit. It also stated that no orders had been, or were intended to be, manded to be, manded to be, manded to be, manded to be, and or the senting of the senting the day, or even altinght; the only prevention being the introduction of liquor, or the soldiers from learing the garrison. The sentinel must indeed have been giren to mistake two "t speciable citizens" to what you may be the pike however is public to the pike however is public to the foregratery of the next day special or the senting the form the commanding officer of the Fort, stanged who happened to be a faw recruit. It also stated that no orders had been, or were intended to be, manded to be,

been, or were immended to be, issued, prohibiting critizens from landing during the day, or even at implicit the only prevention being the introduction of liquor, or the soldiers from leaving the garrison. The sentinel must indeed have been green to mistake two "trapectable citizens" for whiskey smugglers.

Wonderful Machanism.—One of the most chairm is the famous clock in the Cathedral of Strasburg. Every day at noon, a cock on its summin flaps its wings and crows, and then the figures of the twelve aposites, one by one pass by the figure of the Savior, who imposes this hands upon each in blessing as they move. Not for this exhibition, but for the wonderful accuracy with which thus clock records many accounting the phenomena of difficult calculation is its world-famous.

The following account of the late remarkable eclipse of the sun as it appeared in this clock is a lite the moon, of a diameter of about the size of a pea. On the 28th of July, at the very menon, of a diameter of about the size of a pea. A PRYING YARKER—A Yankee in London at the World's Fair, has given a very convincing proof of the pring character of his countrymen; he has anceceded in picking his way into the hear patential lock-wands by the English manufacturers. This feat was done by Mr. Hobb., who operated upon a lock placed upon the wait door of the Nitae Papers. Office, and considered proof against any pickleck. In twenty-live ninuies he was in among the Nitae records, and in ten minutes after the re-lock-dithed door, a feat, the lock being a detector, that was thought impossible. He is to experiment on another patent lock, which is to be enclosed between two bartle, scaled by the committee, and mothing house the lock being a detector, that was thought impossible. He is to experiment on another patent lock, which is to be enclosed between two bartle, scaled by the committee, and mothing house hole for the key is to be exposed to new, and thirry days is to be the period allowed for opening it. The experiment is looked forward to with considerable interest by all persons connected with the trade. Mr. If we have a reward of £200 to any person who can pick of long a tlass-key which will open it, after examining the lock and key for any person they may please.

AFRENNITE, S. C. Aug. 22.

Disastrop's Reiner-Losson large—Wewere resisted, on Theeday evening last, with one of the most disastrose rains that has been known for many years, in those words. It commenced faling about 4 o'clock, P. M., and continued to fall in torrents anvil about 10. All the bottom lands within five miles of this village were completely overflowed, and the corn, (which, on the bottoms, was our only hope,) was laid flat to the ground. The long is incalculable at present. The bridge on the Columba Singer Road, crossing Little River, was completely washed away, and a negro boy, belonging to Dr. J. W. Simpson, was drowned in attempting to cross. Drifty Cream of the willage. All the mill dame, from which we have accounts, as ver, are either washed away, or so completely inundated that the damager cannot be accordined. It will be remembered that on the 24th of August last year, a storm occurred which did immense damage to the corn, but it was not preceded by such bad prospects for a crop as this. AURENSVIILL, S. C.
