OFFICE, 83 CHARTRES ST.

THE DAILY BEE. TUESDAY MORNING, FEB. 18, 1841 THE NORTHERN MAIL failed yesterday from

The community were rather startled yesterday by the European despatches announcing the profipect of a war between the United States and Great Britain. The quidasses were all age with the news, and credulous people were ready to believe the wildest and most improbable rumors. A little cool reflection would have spared a vast amount of speculation, and no small share of anxiety. The despatches themselves are as vague and unsatisfactory as they usually are—perhaps a little more so in this instance, precisely because clear and circumstantial accounts were greatly to be desired. What is their purport! That excitement prevailed in Egaland in consequence of removes prevailing of the immineace of war with the United States. It was rumored (rumors again) that Mr. community were rather startled yesterining in consequence of reases prevaining of the imminence of war with the United States. It was removed (rumors again) that Mr. 2 BECERANA had demanded his passports, and this grave act was attributed to the alterostion which had taken place some days previously between him and Lord Clarendon.—The tone of the British press was insulting through the commerce of England deprecates war. This is the condensed outline of the news, and, as the reader must perceive, it is composed of nothing but rumor. The many-tongued jade figures in every line of the despatches.

For ourselves, we believe neither that war is immissed, nor inevitable. The Central American question is aneologically a thorny one. That it may create some condenses, and

aiready produced a state of things that must necessarily lead to war, is wholly incredible. The very fact that England was about to send Envoys to Brazil to engage the infector of that sovereignty in arranging the Central American controversy; is proof positive that the hope of a peaceful solution is far from being abandoned. Nor are we at all disposed to believe that if. Becmanan has been unauthorized rumor. That veteran the two extremities is seventy-three miles. The passenger trains will leave the depot at Algiers every day, at half-past eight of clock, A. M., and arrive at Bayou Bouff at half-past eight of clock, P. M., and strive at decisive step in a matter of so much tatesman is the last man in the world to take a decisave step in a matter of so much elicacy, and of such paramount importance. As for the tone of the British press, goes for nothing. English journals are food fabusing the United States, and it must be infessed that American papers are not much behind them in returning the compliment. In time, we regard the news as just including the United States, without for a single mistant attaching to it that alarming in portentious character with which it ap-

ars to be invested by many. War, war, with Great Britain! In the first dace the only war-making power in this coul is Congress, and that body could not posare war, save in consequence of an rse or unfriendly relations is not war; the at be flagrant prevocation or a manifest and ous wrong and insult to justify war. I ill be time enough to consider the necessity a resort to the arbitration of gunpowde ien we shall have suffered from attack n our national honor and dignity. As Great Britain herself, we have no doubt hat her people are stronger than her govern nent: that the former are to a man in favor of peace; that they know and feel that was th the United States might injure us, bu ould rain them, and that they will set their precipitate a rupture. Hence we enter-in considerable confidence that all the "runors" with which the public has been satisfied in reference to this subject will be dissipated into thin air, and that we shall have le of both countries preserve their com

ntingent prospect of a quarrel, it is to be ped that Congress will be stimulated to the performance of its duty, and that one of its earliest acts will be the enlargement of our party to a somewhat respectable size, and the

WHAT THE LEGISLATURE IS DOING

We have received from Mr. Coxe and the of interest, though we can scarcely de to be of interest, though we can scarcely amore to-day than give them a passing notice.

A bill to create additional Sheriffs in the Parcish of Orleans is a measure of partiash manufacture, uncalled for unnecessary, and which will saddle the City and State with increased expenditures. It is held in ferrorem.

The second form from the constraints of the arms of the American Second form from the constraints of the arms of t be heard of the bill to create five additional Sherifa. Mark the result, and see if we are not prophets.

A voluminous bill, to provide for a survey of the Parish and City of New Orleans, and for plan books, in order to insure a just and equal assessment of taxes upon real estate, repeals the act of the 18th March, 1852, which appropriated \$5,000 for this object, and providing to the appointment by the Maywith minuteness the manner in which the survey shall be conducted, pointing out all the duties to be performed, with marked precision, and providing for the appointment by the Mayor and Board of Aldermen of a proper person for the aforesaid service, and empowering the Common Council to raise by tax the sum of \$15,000 to defray the expenses of the service. The object of this bill is praiseworthy, but the act itself is cambrous and complex.—The Sike is to give \$15,000, and the city the same amount for a survey. The person chosen to do the work must be nominated by the Mayor, confirmed by the Board of Aldermen, and appointed by the Governor. Why not entrust the service to the regular Surveyor of the city, requiring him to select aids and deputtes, binding him by a contract, and paying him for the additional labor. Besides, the amended charter provides amply for a thorough and accurate survey of the city, and in the event of its adoption, the Legislature could readily appropriate the sum provided for in this bill.

A bill binding the number of Notaries Pub-

in think the limitation of the number wise and prudent.

An act to organize the department of the Natural Sciences of the University, the design of the bill sto on Countries and Proceedings of the State of the University.

The design of the bill sto on Countries are the Second of the Second of the Second of the Countries of the Second o An act to organize the department of the Natural Sciences of the University of Louistans. The design of this bill is to in-corporate the New Orleans Mechanics So-ciety into the University of Louisians, as "The Department of the Natural Sciences." ciety into the University of Louisians, as ... The Department of the Natural Sciences." with a district Faculty to be composed of three professorahips, viz. of Astronomy and Natural Philosophy; of Chemistry, Geology and Mineralogy, and of Mechanics and Mechanism. The professors to deliver lectures, for which a stipulated price of admission shall be asked; the caures to hast five months; the professors to be paid for their services by the Mechanical Society, and the Department to be maintained by that Boolety exclusively; the sum of thirty-five thousand dollars to be donated by the State to carry out these objects; the Society to agree to erect a suitable building for the Department, and provide the requisite apparatus, Finnily, the Society to to digitate itself to maintain as indigent student, such year, who should be suited to a finite of the state to deligate itself to maintain as indigent student, such year, who should be actived to a first the control of the cont

First IX PLAQUENINA.—The Southern (ther-ville) Sensine says:

On Monday morning last, about 3 A. M., our citizens were aroused by the cry of Seré.

—which proved to be the stable and ware-house of J. B. Roth, Esq., situated in the heart of the town. Before any one, perhaps, was upen the spot, the whole building was enveloped in fames. It was occupied by the Meers. Roth, we believe, as a warehouse for various articles of hardware, the contents of which were lost. In one end was a stable, (rented, if we mistake not, by the proprietor of the Louistians Hotel) in which was the horse and buggy of Dr. Casadavant—horse perished, buggy consumed. Adjoining the warehouse was the stable of Mrs. Tuttle: the right of the third was the warehouse of Hart. Ans tin & Co...—all of which were consumed, the latter lesing about \$6.00. The night was quite still. Had there been anything of a breeze, a great destruction of property would have ensued. Fine in Plaquenine...The Southern (Ibe
