THE FUTURE.

The Presidential election has resulted as it may. The contest has been protracted, exciting, and has engendered feelings of bitterness in many families which time and reason alone can obliterate. In the olden days, when excitement seldom penetrated beyond society, and rarely influenced the prudent and sagacious of peaceful communities, were alone the arbiters of the fortunes of the country, were alone the depositaries of wisdom and the guardians of honor, and its people were content to be conducted by the counsels of their Marions, which shown a Democratic gain of 130.

Important Commercial Intelligence.

ADVANCE IN COTTON.

NEW YORK, Nov. 5.—The Royal mail steamship *Canada*, Captain Lang, from Liverpol on the afternoon of the 25th ult., arrived at Halifax this evening, *en route* for Boston.

The *Baltic* arrived out at Liverpool on the 22d.

COMMERCIAL INTELLIGENCE.

COTTON.—The advices by the *Baltic* from the United States caused an advance of from ⅛ to ¼d., and an active speculative demand. The sales of the week amounted to 130,000 bales, of which speculators took 59,000 and exporters 12,000. On Friday the market was dull and the sales amounted to only 5000 or 6,000.

The Brokers' circular quotes Fair Orleans 7¾; Middling Orleans 6 13-16; Fair Uplands 7; Middling Uplands 6¼—the lower qualities showing the most improvement.

LONDON MARKETS.

Baring, Brothers & Co. quote the market as active. Sugar has advanced 6d. to 1s.

MONEY MARKET.

The money market is unchanged. Consols are quoted at 91¾ a 91¾.

The return to the Bank of England has increased £1,641,000.

RIVER INTELLIGENCE.

Louisville, Nov. 5.—The river is at a stand, with three feet to Cincinnati.

Vicksburg, Nov. 5.—The Defender passed down at 3 P. M.

OHIO—OFFICIAL VOTE.—The *State Journal* publishes the official vote of all the counties in the State except Coshocton, Darke, Erie and Wyandotte, on the Supreme Judge, with the following result:

Bowen, Republican	.....	147,726
Swazie, Democrat	Polled	131,656
Bush, American	23,557	
Majority		16,070

The reported majority in the absent counties is about 1,000 Republican.

THE ALTHAUS FORGERIES AT ALBANY.—The fact has already been mentioned that Andrew J. Fitzhugh, of *Martha Washington* notoriety, was in custody at Albany, New York, on a charge of forgery, his arrest having been effected by officer Graham, of Baltimore, aided by the New York police. It appears that last spring the firm names of the mercantile house of A. D. Shepard & Co. and Meinrath & Bagley, at Albany, were forged to checks—one for $4000 and the other $5000—and the money paid upon them by the Bank of Albany and the Bank of the Capitol. The forgeries, it is said, were master pieces, and were evidently perpetrated by some finished operator, but no arrest took place until the 14th inst., when Finlay was seized on suspicion. He had a partial examination on Saturday, and the Albany *Argus*, after giving the evidence of three of the most important witnesses, remarks:

Thus far the evidence is not strong enough to hold him, and one fact strongly in his favor is that the three important witnesses contradict each other with regard to his moustache and whiskers. Finlay, of course, asserts also his innocence, and expresses himself confident of being able to prove an *alibi*. He is one of the first of his class in this country—a man of polished address, gentlemanly appearance, and, it is evident, is endowed with much nerve.

Throughout the examination he submitted to the scrutinizing gaze of all in the court-room, without allowing a muscle of his face to be ruffled or his eye to falter in its steadiness. He was a prominent member of the Kossane party in the famous *Martha Washington* fraud case, and was once arrested for a heavy forgery on the New York Chemical Bank. On that occasion, when confronted with the teller, his iron nerves forsook him, and, writing down his confessed his guilt.—By implicating other parties and returning the money he escaped punishment then.

He is said to be of a wealthy family in Cincinnati, a domestic establishment in Baltimore, and a similar one in New Orleans, each of which he maintains in a most reckless style. What is somewhat singular, many who saw him on Saturday say that his countenance is quite familiar to them, but they cannot place him, and say there are several peculiarities about his countenance so prominent that, once seen, it is difficult to imagine how they could ever escape the memory.

Commodore Stockton and the Presidential Question.

NEWARK, N. J., Oct. 28, 1856.

The Washington dispatch published in the New York *Herald* of this morning, to the effect that Commodore Stockton will to-day come out with a letter in favor of Fremont for the Presidency, finds no credence here, and the letter reserred to has not yet been heard of, either in this city or Trenton. The story is possibly founded on the efforts the Commodore is making to bring about a fusion between the Americans and Republicans.

New Jersey Republican and American Electoral Convention.

TRENTON, N. J., Oct. 29.—The Republicans and Americans met here to-day, for the purpose of forming a united electoral ticket. A respectable number of both parties were present. They met in separate conventions. The Republicans proposed to the Americans a fusion, similar to that made in Pennsylvania, but a difficulty arose about the terms of the proposition. A second proposition was then made by the Republicans, to which the Americans have not yet given an answer. A compromise could be made. The Republicans then directed their Executive Committee to prepare a statement of the reasons which conventions then adjourned, and no fusion was effected.

VULGAR ERROR.—English travelers represent the Americans as a debilitated, degenerate and sickly race, and the nonsense is reiterated in this country by those who ought to know better. It is a little singular that such an enfeebled race should have accomplished more physical labor in subduing an entire continent in less than two centuries than all the nations of Europe have done for their own countries in the same time.—Physically, morally and mentally, there is no more vigorous race than the American on the globe. They live as long, are as hearty against all fatigue, and can accomplish as much labor, mentally and physically, as any other people. They have peopled a continent and cultivated it till it produces abundance, have traversed it with railroads and telegraphs, built up a commercial marine equal to the largest, and established the most country tional government that was ever devised by man. We want no better evidences that these of the vigor of body, physique or of the activity and strength of their mental constitutions.

Fresh ground coffee is strongly recommended as a deodorizer and purifier in sick rooms, and is also an excellent preservative of game to be sent to a distance. Clean the game, cover the wounded parts with sifting coffee, and sprinkle fresh ground coffee over and among the feathers or fur, as the case may be, and the game will keep good in any weather.

THE ATLANTIC NEWS.

The U. S. mail steamship *Atlantic* arrived at New York on the evening of the 28th ult., with dates from Liverpool to the 15th.

GREAT BRITAIN.—*Pensions and Friends.—The English View of Russian.—More Severe Measures.*—Despatches from England say there is nothing worth repetition, except that a piece of gossip to the effect that Lord Palmerston, without consulting the Queen, appointed Rev. Mr. Prescott to the Deanery of Durham, but the Queen, on reading the appointment in the papers, sent for Palmerston, "mumbled" him soundly, and canceled the appointment.

Government—that is to say Lord Palmerston—has granted a pension of £100 per annum to the widow of the late ROBERT Abbott, and has contributed £100 towards the maintenance of Angus Roach, who is insane.

W. A. Robson, the person charged with fraud in the share department of the Syden ham crystal palace, and who was recently apprehended in Boston, whither he had fled, has been committed for trial.

A burst of correspondence has taken place in the London papers on the subject of Kansas. The letters are mostly mere expressions of opinion, with the exception of one from Mr. Gladstone, of Surry, who recently made a tour in Kansas, and gives a rather graphic sketch—in the anti-slavery interest —of what he saw there.

A near line of screw steamers is about to be established between London and Valparaiso. The first ship, the *Chile*, of 1,000 tons, will start the 20th of November. She will proceed from Valparaiso to Coquimbo and Caldera, and will also forward passengers to the principal ports of Peru.

The London *Time's* monetary article, of Monday evening, the 13th, notices that the reports from the manufacturing towns for the past week confirm all that has been said regarding the extent to which the trade of the country is independent of the movements of the discount market. In no quarter is there the slightest indication whatever of the advance to 6 and 7 per cent. having interfered with the regular course of operations. At Manchester prices have been fairly maintained, and goods for the most part are firmly held. At Birmingham there has been full employment, and prospects are encouraging. Foreign orders are received to an average extent, while from America the demand is quite active. For iron the previous quotations are still maintained by the leading firms, although there is much undersselling. The Nottingham advices describe an active business, both in lace and hosiery, with a tendency to higher prices. In the woolen districts there is great steadiness, the lower demand being satisfactory. The Irish linen trade is also said to be in a satisfactory condition.

FRANCE.—*Financial Affairs Improving.—Miscellaneous Items.—Abandonment of the Neapolitan Expedition.—General Movement on Behalf of the British Status.*

Letters from Paris on the subject of the financial crisis are less unfavorable. The bullion of the Bank is said to be increasing both in Paris and at the Bank of France. It is added that some of the dealers who have lately drawn 5 franc pieces from the Provinces, for the purpose of selling, are depositing the bars at the Bank for an advance of notes upon them. The police measures to prevent the purchase of gold at a premium are also stated to have temporarily succeeded.

The Neapolitan affair also remains as before—all but settled. All thoughts of an expedition to the Bay of Naples are now abandoned. The French and English ministers will not even be recalled. The matter is referred to another Paris conference. Russia is said to have made the formal proposal for convocation of the (second) plenipotentiaries to the Congress of Paris. France and Prussia have adhered, and the consent of England is alone waited for, but is still certainly anticipated.

The French fleet destined to act against Naples remained at Toulon, on the 10th.

Gen. d'Orgoni, a Frenchman, is in Paris, with a suite, as special envoy from the King of Ava to the Emperor Napoleon.

A camp of 60,000 men is soon to be established at Chalons and Sartres.

Prince Mehemet Ali Pacha, of Egypt, has arrived in Paris, via Marseilles.

M. Gevaert, Romant Councilor of State, passed through Berlin a few days since on his way to Paris, bearing the definitive resolutions of Russia to the Emperor Napoleon on the assembling in Paris of the Diplomatic Congress to settle the affairs of the East, Naples, Greece and Neufchatel.

Letters from Paris announce that Messrs. Rothschild have contracted with the Bank of France to supply gold to the amount of £6,400,000. A small portion has been already sent. For some weeks to come, therefore, the Australian and American arrivals of gold will probably be thus absorbed.

The following placard has been secretly posted in various quarters of Paris:

"To the Italian People!—Insurrection is the Holiest Duty!—Issue of Justice!"

July 14th. August 10th. February 24th. January 12th. 14th ct. 15th. February 9th.

Brothers and Friends.—Honor to you who have been not crushed by your many oppressors—who have not been discouraged by the most cruel deception! It is now centuries since the spirit of evil fell upon Italy as the noblest prey it could devour, clutching you in its two talons—Papacy and Empire. For centuries the spirit has sucked your blood, and striven to poison your soul with its pestiferous breath. But your soul is immortal! That priest who returned to Rome through a breach—that Bourbon in whose bosom beats the heart of Tiberius those Austrian ravens that croak upon the harmonious banks of the Adige—all know and feel, and tremble at the knowledge, that intelligence and life have not abandoned their victim. They all feel that the soil of Italy quivers under their accursed feet, and that there are undaunted giants, such as were found formerly in the mountains of heroic Sicily. The blood of martyrs has but fertilized your soil. You possess courage, intelligence, and constancy; and you have that experience which is bought by long misfortune. You want but one thing—arms! You shall have them—you must have them! Already you have appealed to the true children of Italy. Every one of them has offered his mite, so that those who shall first have the honor to proclaim your emancipation, may find ready at their hands the instruments wherewith to carry on the holy war. Our hearts have leaped with joy at the news come to us across the Alps, that you are secretly storing up your first muskets while waiting for the day of your deliverance. We also desire to come to your aid and take part in your fraternal union. Receive, brothers and friends, the produce of the French subscription. Receive it, not only as a proof of sympathy, but also as an offering of gratitude; for you are setting a great and useful example—that of extreme constancy under the weight of extreme oppression. And it is perhaps, from you that the spark will proceed which is destined to reanimate the world. No nation has suffered more than Italy; and none, if there be justice in God, will have a prouder place among the regenerate nations.

For the people and students of Paris,

THE COMMITTEE.

THE NEW PARIS CONGRESS.

The Paris *Debats* publishes an article, signed by M. de Sacy, on the meeting of the Paris Congress. It states that the question of the Island of Serpents has been already settled—that the island is to be reserved to Turkey; that as regards the islands of the Lower Danube, they also will be ceded to the Porte. As regards the union of the Principalities of Moldavia and Wallachia, the *Debats* says as the commission charged to consider the whole question of the Principalities, has not yet entered upon its functions, that question must be deferred; and as France, Austria, England and Turkey each proposed that the Presidency in the commission on the spot which is one of "influence"—the *Debats* is of opinion that this, as well as some other preliminary matters, must be first settled by the Paris Congress before the actual question of the Danubian Principalities is touched upon. No date is yet fixed for the meeting of Congress.

SPAIN.—*Fall of O'Donnel and Restoration of Narvaez, &c.—The New Ministry.*—The important intelligence comes from Madrid, the 12th, of the fall of O'Donnel and restoration of Narvaez to power. O'Donnell has resigned, and with him all his colleagues. The Queen has accepted his resignation. Narvaez is appointed President of the Council, and has already provided himself with thirteen subordinates. He has allotted the principal offices as follows: Pidal, foreign affairs; Isolo, finance; Rocedal, interior; Arzaiuld, justice; Urbistondo, war; Lersundi, marine, Gen. Sanz is appointed Captain General of Madrid, and Gen. Lezuela, Director of the Cavalry.

The Spanish Financial Commissioners have advertised an auction of the foreign redeemable debt, to take place October 31st, for which purpose 370,000 reals have been assigned.

PORTUGAL.—*Electric Telegraph to the Straits.*—Application has been made to the Portuguese government by Mr. Gattil, to lay down an electric telegraph between Portugal and the Straits. A similar application has been made to the Brazilian government.

RUSSIA.—*Abandonment of the Isle of Serpents.*—The Paris *Journal des Debats* contains this announcement:—"We believe that the pretensions raised by Russia with regard to the Isle of Serpents, in the Danube, have now been given way, and the island still again becomes a possession of Turkey. The Shahrade difficulty remains as before.

The Czar was to make his solemn entry into St. Petersburg on the 16th instant.

TURKEY.—*Gotaia Not Seized.*—The report, by seizure of Gotaia by the Austrians was not true. Affairs in the Turkish settlement are progressing slowly, but on the whole, not unfavorably.

AUSTRIA.—*The Ending on the Neapolitan Question.—The Soil Crop.*—According to the Milan *Gazette* the Emperor and Empress of Austria will visit Milan in January, 1857.

Orders have been given to build three ships of the line immediately at Pola.

The Verona official *Gazette*, of the 9th, in an article on the Neapolitan question, says that no serious apprehension should be entertained as to its final result, as Russia, Austria and France can have but one end the same opinion respecting the rights of the people, the best sovereign and the sanctity of treaties.

The *editor*, moreover, adds the dissatisfied have assumed a pleasing appearance, and hope to be soon able to announce that this cloud, which darkened the political horizon of Europe, has vanished.

ITALY.—*Neapolitan Affairs—Preparations for Flight, &c.*—From Naples we have nothing of interest, excepting that preparations for darkness continue. The Austrian and Spanish ambassadors have left for Gaeta, and the Austrian minister has left for Rome. The Spanish minister is also preparing to leave. The Queen of Naples is very ill, and the Queen Mother of Spain is dangerously ill. The Neapolitan squadron, consisting of the *Monarch*, the *Regina*, the *Ercole*, the *Partenope*, the *Archimede*, the *Guiscardo*, the *Tancredi*, the *Roberto*, the *Ruggiero*, the *Sicilia*, the *Capri*, the *Ischia*, the *Procida*, the *Stromboli*, the *Ferdinando*, the *Vesuvio*, the *Etna*, the *Amalfi*, the *Sorrento*, the *Gaeta*, the *Palinuro*, the *Ulisse*, the *Eolo*, the *Nettuno*, the *Minerva*, the *Giove*, the *Ettore Fieramosca*, the *Delfino*, the *Cosmopolita*, the *Guerriero*, the *Veloce*, the *Valoroso*, the *Fulmine*, the *Tritone*, the *Ercole*, the *Iride*, the *Mercurio*, the *Messaggiero*, the *Cacciatore*, the *Rapido*, the *Staffetta*, the *Corriere*, the *Nunzio*, the *Ettore Carafa*, the *Colombo
