THE DAILY BEE. A PREDICTION PULFILLED.

We have no special love for Senator SEWARD He is the leader of an execuable faction whose only principle is hatred to the South Kewako himself is by far more dangerous than any of his more violent and noisy associated the second secon leader of an execrable facti than any of his more violent and noisy asso-cates, massimuch as his ability is greater, his sagacity keener, his manners less repai-sive, and his policy more insidious. But while we detest Sawain, the politician and demagage, we have a high respect for Saw-ain, the thicker and stateman. For public men in America have been more carefully trained in the field of nollities, or are more men in America have been more carefully trained in the field of politics, or are more competent to discuss abstrace problems of governmental science. His speeches are terres specimens of compact reasoning, constructed with elaborate care, elevated and dignified in language, sparing of ornament, and decorated with insteadough of gure and trope to releve them of boldness. Senator S awarp's views of all subjects, in which his terrous attention. One of the most remarks, the instances of prophecy fulfilled, says the Wilmington (N. C.) Herald, is to be found in the following extract from a speech delivered y Senator Saward in the United States Ser bing ago as March 1855. He foresa ears ago the commercial revulsion with wift-it the country now labors; and deduced from the signs of the times at that period the happening of the financial crisis with it has burst upon it. He predicted that we should have a crushing pressure in 1857, and we have it sure enough. He confended that the general financial system of the coun-try was much deranged by excessive impor-tations, atmulated by a low tariff of duties, and by unexampled enlargement of credits, leading, as these must necessarily lead, to great financial embarrassment:

is brings me back to the precise quea-thich I discussed here a few days ago, k. ser, that the restoration of the busi-ed rairroad building to a healthy state rest us either to leave it to work out its cure, or else to adopt a remedy very ent from what is here proposed—a by which will stimulate production of th which we are contenting arose save importations. EXECUTION OF A PEMALE IN DENMARK.—Capital punishments are extremely rare in Denmark, and when, consequently, one takes place. It occasions an immense aemation. The announcement, some time ago, that a woman, under sentence of death, in prison in the province of Juliand (where, it is certain, there has been in execution for three hundred years) was to be executed the next morning, not only plunged the whole neighboring country into commotion, but attracted crowds from a great distance. The condemmed was a voice. EXECUTION OF A FEMALE IN DENMARK .-- CAN

for the scaffold she refused to be conveyed in a cart, but, taking the executioner by the arm, waited firmly there. Having run up the steps, she should near the state block, listening with freat calments to the reading of the text of her cendemnation, a very profix document. She, then took off her cap and shawl, threw them at her feet, and bandaged her eyes with her bandkerchief. She then knelt down and placed her head on the block—a moment after the safe felt. The extraordinary calminess of the woman astonished the spectators, who were upwards of 20,000 in number.
