A PHONUNCIAMIENTO. During the recent exciting canvass in Illimos, the Philadelphia Press was the uncompromising adherent and champion of Judge Biculas. No paper sustained him more ardently, or rejected more heartily at his triumph. The re-election of Doculas and his return to Washington are themses upon which Gol. Founds dilates with evident deposits the proof of the triumph of triumph of the triu return to Washington are insuess upwhich Gol. Forsary dilates with evident delight. It is manifest that the editor of the Press from being the bosom friend of the Press dent, has been converted tato his inplacable enemy; that one of the reasons which operate with Gol. Forsary in sustaining but that so enthusiastically and persevering; to the being that the Bonator from Billiods is destined hereafter to humble and overthrow the present Administration. Donetas is to be used by the anti-Lacompton wing of the party with Mr. Borasaran at its head, and the Charleston Convention is to be the great field of the forthcoming struggle. In proof of this we perceive that Col. Forsary, from his perch at Washington, where is busily-ingaged in watching and sapervaging the pivements of parties, has issued a nort of political manifesto respecting but cars, his policy and his plans. Col. Fornort of political manifesto respecting EY is said to enjoy the unlimited confidence (Douglas, and to shape all the discipline FUNNAY In this cracular epistic informs the requirity that the anti-Lecompton Democracy will not make peage with the Freedont; that the law rean never be restored to their gaver? that he is a fill-stone around the neck of the Democratic party, and if not cast saids, will drag it to a premature grave, beyond the hope of resurrection. It is further chirmed that the Administration "has deliverable" resolved to solve the Charleston Convention, and in that body to defeat any mare that can be elected; "because, to use Fokwar's own language, "any such man must stand forth the unrelenting adversary of the caw scheme of a slave code in the Territories, or of Congressional intervention for the protection of a saver in the Territories."—

or of Congressional intervention for the ction of navery in the Territories."—
as Senator Durolas, according to this authority, is that man, it follows that author the the choice of the Charleston is this to terminate the struggle? By no a'es in tolerably explicit language that it ie Charleston Convention nominate any uthern Lecompionite, its candidate will be aten. In other words, if the Democrats ink proper to gwe the go-by to Douglas, he is employ all ass influence to defeat the

Should the adherents of the present de-gravied dynasty be permitted to make a non-ination at Charleston, and lay down a piat-torm which will be neither more nor less than a budget of fakehood or descrift. No such movement still tere be belerated. The day has gone by for any more of such unmeaning platitudes. The Democratis who fought skainst the Administration last year, and who will consine this see, occupy a high moral position, which they will not compro-mise.

In the foregoing, the name of Doublas is not mentioned, but as he constitutes the leader of the anti-Administration Democrate, the allusion is clearly to him.

Several weeks ago we argued that the lemocratic party had pursued a false policy for the past six months in countensacing the persecution of Doublas by the Administration; that by se doing it had rendered a condial reconciliation extremely difficult; that he victory achieved by Doublas would extend the property of th ctory achieved by Douglas would ex party, and in fise that he was now in a posi-tion to dictate his own terms to the Democ-racy, or to subject them to unavoidable defeat in 1961. The view we took, though impaintable to many adherents of the Ad-in matration, a borne out by late develop-ments. Every word of the oracular utter-ances of Col. loaner tends to prove that the special friends of florenas are resolved, if possible, to make him the party candidate for President, and to employ his power and agency to effect the discombure of his quon-dam alies. The only doubt in our mind is, of such mingled perfidy and meanness. We are straid be is not superior to the vindictive in sure of retailation, or to the supreme design of exhibiting his control of the party which has trauced and maligned him. We give Senator loveras credit for his moral courage, his indomitable energy, his tant, sagacity and knowledge of mankind, but we have yet to learn that he possesses that ability of self-conquest which would prompt a truly noble mind to discard every groveling and unworthy thought, and to sacridce his cover aspirations for the paramount good of the the pa we aspirations for the paramount good of he country. Time will decide whether the

Eurerno Biology -It will be borne in mir Electro Biology — It will be borne in mind that Dr. Hale delivers another of his enter-taining and instructive illustrated lectures this evening at Odd Pellows' Hall, on which increasing the properties of the latter will doubtless be, as usual, an interhausitole fund of pleasant recreation.

We take occasion to direct the attention of the ladies to the fact that the Doctor will give a free lecture exclusively to them this day at twelre o'clock. This will be introductory to a course of six lectures designed to ladies, and in which will be taught the application of electro biology to the treatment of disease. Such a course must be summently interesting and replete with valuable knowledge. As a ticket to the entire eminently interesting and replete with valuable knowledge. As a ticket to the entire curse may be obtained for the trifling sum of one dollar, it is presumed that a large number of the ladies of our city will gladly avail themselves of the opportunity of becoming acquainted with the weederful phe, momens of electro-biology, and especially with its efficacy as a curative agent.

BUN MUTUAL INSURANCE.—We invite atter tion to the third annual statement of this well conducted and flourishing institution. During the past year, it will be seen that the During the past year, it will be seen that the company has been extremely prosperous, its business having largely increased, while its lesses have been comparatively smile. The Buard of Directors have accordingly declared a dividend of sixty per cent, certificates for which will be issued on and after the 24th February next; and have likewise resolved to pay an interest of six per cent, in cash on the outstanding certificates of profits.
