market, has, it is certain, been largely invested in by those angitaline who wied the chief infinence in our money market. Their stems are of centre private; their value in this form is much greater. A tight mostly market on only bring them forth. The schemes for all purposes which have been insuched are efficiently infinited at greener; more gold in the coften of the Beat of Registed would only tend to increase seek metasses, and make the risk of reaction greater. But now, when the sloods which correspond to be been, and make the risk of reaction greater. But now, when the sloods which correspond to be been, and any storm that may follow trise the stability of our market, those private recovers will be of great value, and also of great profit, to their holders.

2. The security of our country makers for the gold stores of all the abiled trading constricts and sudcottoridy for American capitalistic, set well as Risasian and other: in a smalled degree, we as this time hold large reserves in the fluctuation. reil as Massian not be a second of their agents.

These two causes, then, for the absorption of gold in private stores being undoubtedly in operation. I am estimate that they are sufficient to account for our present position in this reason.
