THE SOCIAL SCIENCE REVIEW.—We have received, through Mr. B. F. Goyarty, bookseller and stationer, 74 Camp street, the July number of the *Social Science: Quarterly Review*, published in New York City, and of which Messrs Delmor and Stern are the editors. Its articles are on interesting topics which are treated, generally, with vigor, boldness, independence, and a latitude suited to the wide field which events have laid open for unsettled and discursive minds to wander in and theorize

Among the articles is one on the Growth of National Wealth; another discusses Negro Suffrage, which the writer thinks the Southern States ought to adopt as the means of disarming the Phillips and Sumner Radicals. He supports this view with ingenuity and considerable force.

THE SOUTH.—This is a double sheet weekly which, as heretofore announced, made its first appearance yesterday morning. Its proprietors are John W. Overall, chief editor, and John G Wire, business manager. The typographical and mechanical features evince a skill and taste worthy the editorial ability and general literary excellence which distinguish its columns. The Jeff. Davis Meeting in N. York

A few days ago the telegraph gave an account of a meeting in New York by the friends of Jeff. Davis. According to this report, it was maintained at that meeting that the Southern rebellion was still alive in a different form, and other declarations were made of a Secession and rebellious character.

This statement was incredible on its face No friends of Jeff. Davis, no well-wishers for the South, could speak in the manner alleged. As they must well know that doing so would surround the late head of the Confederacy with greater peril, and draw upon the lately rebellious States increased suspicion while giving to their enemies new pretext for retaining them under rigorous military authority. The Radicals indeed charged that the people of those States were not sincerely loyal, but were still rebels in spirit and so far as passion is not, and therefore not to be trusted. To indulge such an accusation would be a strange display of friendship

The whole story had the complexion of the system of misrepresenting feeling and opinion at the South, adopted by certain journalists and correspondents in order to justify their arguments for denying to the Southern people restoration on terms of constitutional equality

There now seems no doubt that no such meeting as that reported by the telegraph took place. A meeting was held in reference to the trial of Jefferson Davis and other prisoners of State, and to it Horace Greeley,—a very unlikely presence at a secession and proslavery conference, — was invited. Referring to the occasion Greeley says in the *Tribune* of the 3d, Mr. Greeley said:

Certain citizens were invited — we know not by whom — to attend a meeting last Monday or Tuesday, to consider what ought to be done to secure a fair impartial trial according to law to Jefferson Davis and others now held by our Government as its prisoners of State. We were invited, but did not attend, having a dislike to meetings that may be termed secret, which have any relation to public affairs: but we are entirely and heartily in favor of the widest attention and interest in the question — that is, to securing to the accused of high crimes a fair public and impartial trial. Some one reported to the Evening Post that a meeting of Democrats met and that Democratic orators openly proclaimed by implication or inference, which Peter J. Carter (who was there) most emphatically denies. They are not aware that any Democrats thought that could arise and condemn in any manner which the decision of persons of Radical views might render necessary or proper. The meeting, however, was not composed exclusively of Democrats, but of persons of various views, and was addressed by Democrats and Republicans alike, who gave no cause for regret to have been present, as did *The Livingston* and others at the meeting in question.

TEXAS WHEAT AND THE WORM RIDDLE.—The Galveston *Civilian* of the 5th says:

The extensive wheat fields in the region of the north, if not the most important thing in the whole State of Texas. The demand for flour in the interior and ports of the Gulf, would bring millions into the coffers of Texas, when all the land in the State is cultivated to its fullest extent. We have, however, to contend with the difficulty of the worm riddle, which is supposed to be caused by the dust of the soil charged with the fertilizing principle, and which is carried by the wind from the interior of the country. It is upon this supposition that the Government of the Queen of Spain have ordered a mill built at Cadiz, to grind wheat flour imported into Cadiz, from Puerto Rico, ports. It appears that other Colonies, Egypt &c., have employed mills, which, under a patent for grinding wheat, reduces it to meal, and, at the same time, the worms or eggs are destroyed. Mr. Bee will be found in consultation with the Governor of the Queen of Spain, and ordered a mill built, which, if successful, opens new important field for Texas wheat
