ALL THAT'S BRIGHT MUST FADE, is not applicable to a fine set of teeth brushed with Fragrant Sozodont. Its protective, preservative, and beautifying properties will preserve the whiteness, soundness and natural polish of good teeth throughout life. And when unsound, it will arrest decay, and remove from the breath the taint which decomposition generates.

Mr. Sammarcelli, a professor of the French language, requests us to rectify an error which has crept in his advertisement published a few days ago in this paper. Instead of 130 lessons *in the month*, the meaning was 130 lessons *at least*.

The professor publishes another card in this morning's *Bee*.

Connecticut and Negro Suffrage.

The recent vote in Connecticut on the negro suffrage question is likely to puzzle, and perhaps seriously embarrass the Radical tacticians in the coming session of Congress. The old Constitution of that State excluded the negro population from the elective franchise. An attempt was made a few years ago to repeal the disqualifying clause and confer the right of suffrage on the negroes by an amendment to that effect submitted to the people. The proposition was then voted down by a decided majority. From that time the negroes in Connecticut remained without political privileges, as they had previously remained from an ante-Revolutionary period, until not long since, when the Radical politicians of that State deemed it prudent, inasmuch as they intended to insist on negro suffrage in the Southern States as a "essential" feature of a republican form of government, to take measures for putting their own house in order in reference to this question. Wherefore, they revived the [illegible] amendment and it submitted to the people with the confident expectation that, in this instance, it would be adopted.

But best laid schemes of mice and men are liable to miscarry; accidents and misadventures may happen even in so proper a Radical family as the wooden nutmeg State was supposed to be. The election on the amendment for enfranchising the Connecticut negroes took place a few days ago, and was watched with eager interest by Radicals and Conservatives from one end of the country to the other. The telegraph has informed us of the result. A majority of about six thousand was cast against the proposition; it was defeated by as decided a vote as on the former occasion of its submission. Thus Connecticut, on the Sumner-Stevens theory, has, by an express vote, elected not to possess a republican form of government; and this State, after thus formally and definitively denying the right of suffrage to the negro, and refusing to recognize his political equality, will send her Representatives to Congress at the same time with Southern States whose Representatives the Radical leaders say must be rejected, unless elected by black and white voters, on the ground that they come from States which do not possess a republican form of government. If this is sufficient ground, then Connecticut must be denied representation and be put out of the Union: and so must, as we believe, Pennsylvania, together with nearly all the Western States and California.

The case of Connecticut will be especially embarrassing from the fact that she is the first of the old free States of acknowledged Abolition sentiments in which the question of negro suffrage has been directly and formally acted upon by the people; and the result goes to show that the Northern whites at home deny emphatically what their Radical politicians insist on forcing upon the South, the political equality of the negro.
