MONETABY AND FINANCIAL.

OFFICE 73 CHARTRES STREET.

THE WATER WORKS QUESTION.

A temporary interference with the supply of water to the press manchinery of our neighbors of the Bulletin subride them a text from which to inveigh against the Water Works Company and to advenue the purchase of these works by the city. This academs might have happened under the best management, whether that of a private corporation or officers of the municipal generation, and does not farming a work of the company and the supplementation of the purchase recommended.

Seeh a mischane has nothing to do with the company of the purchase results of the purchase recommended. THE WATER WORKS QUESTION,

ineigal arguresponding of our confrère generally carries with
it.

We may have the "right" of doing a thingwhen it may be nawless to exercise that right,
and if the design be to recell these works to a
fitution, ip.

he "reba!"

attention, ip.

he "reba!"

attention of the design be to recell these works to a

private corporation, then the argument in favor

of their administration by the city government

and against that of private parties falls to the

near the proposition as to whether it would be prudent

time. That proposition seems to have been

all and pun

for it says, there is but a slogic argument against

OITY INTELLIGENCE.

wunleipal generation, and does not faraish a very strong reason for the purchase recommended.

See a mischance has nothing to do with the propriety or expediency of the dity is perchaseing these works, a question which is to be determined by considering, first, whether to be determined by considering, first, whether and the tax payors in particular, to increase the add the tax payors in particular, to increase the add the tax payors in particular, to increase the add the tax payors in particular, to increase the add the tax payors in particular, to increase the add to the city is the sum of two millions of the compliant the designs of those who favor the compliant the designs of those who favor the produced in a more efficient manner by of fine to of the minipal corporation than by the figure of the complicy of the minipal corporation than by the figure of the complex of the minipal corporation than by the delivery of its gwn boads, and would make money by resulling the works payable in some other, and more series medium—any cash or it equivalent. 2 Because every person in the baving a copions supply of Mississippi river waier, and it is in either right increase in the single dependent upon private parties or a monopoly for his supply.

These arguments have not the force which the reasoning of our confrere generally carries with the companies and the carpolitant desired.
