MONETABY AND FINANCIAL. THERDAY EVENING, May 5, 1818

The money market proper continues to exhibit the features nuticed in our last report. There is an abundant supply of unemployed capital. Int only a moderate am ante available for the ordinary movement, and lenders are unwilling to accept any but first clase securities and signatures, inferior grades being difficult to place even on much more onerous terms than the ruling rates. Mortgage paper is quoted at 10 to 12 per cent. per anoum for Al., but 10 is exceptional, and round amounts, first clase, both as to property and signatures, are offered at 12. The market may be more correctly reported at 11 to 12 for first clase or strictly Al., and 13 to 15 for good but less desirable descriptions. Good commercial paper, sectived by satisfactory collarests, and second class at 14 to 15. The hanks discount most of the approved business paper offered by their customers, and are free landers on call, or for short periods on satisfactory collaterals.
