The corporation was called the Quebec Lake Superior Copper Mining Company. Operations were conducted for several years...

It was not expected by the last group of people which departed from the place that the village would be deserted...

As soon as it was discovered that no one was left to take care of the mill, shops, store and houses...

LEADS CHICAGO IN DIVORCES.

Separations in Minneapolis—More Numerous, According to Population.

Minneapolis, Minn.—With a population one-tenth as large as Chicago, it is estimated Minneapolis has granted in the last 21 years one-eighth as many divorces as Chicago...

Such is the estimate of Clifford Jerome, who is the government's representative in this city securing statistics as to the number of divorces granted during the last 20 years.

"One peculiar thing," he said, "about the work here is that there are five grounds on which one may secure a divorce, while in Washington or any other city in the District of Columbia there is only one—infidelity."

A census of divorce cases and matter pertaining to them is in progress all over the country, but started only this week in Minneapolis.

INEBRIETY A DEFINITE DISEASE.

Physician Declares Use of Alcohol Is Symptom of Some Disorder.

Toronto, Ont.—That the use of alcohol is in most cases a symptom of some disorder and not a cause was the theory advanced by Dr. T. D. Crothers, superintendent of the Walnut Lodge hospital of Hartford, Conn., in a paper on "The Insanity of Inebriety," read before the British Medical association.

"The term 'inebriety,'" declared Dr. Crothers, "describes a condition which calls for alcohol for its anesthetic effect, and in reality means a disease or disorder of the brain, for which alcohol is a most grateful remedy."

A scientific study of inebriety indicates a definite disease, with distinct causes, progress and termination, the same as other diseases.

SCENTS BURIED TREASURE.

Man Finds Mark of Vessel That May Have Held Gold.

Fort Worth, Tex.—While looking over his pasture in Red county Mr. Dillard, who lives near Thorp Springs, was attracted by a mound of fresh earth. Upon investigation it was discovered that a hole had been dug and at the bottom was the imprint of some kind of a vessel that had been removed.

The place is particularly marked, the excavation being in the center of four roughly hewn stones, set in a square and sunk almost out of sight in the earth. A short distance from this square is another stone with a hatchet sketched on its surface, the edge of the hatchet blade pointing directly to the place where the excavation was made.

Mr. Dillard says he had often noticed the stones, but supposed they were simply an old landmark. The supposition is that the vessel contained money and the find may be connected with an old story that has been told in that section ever since it was first settled.

This story is that in the country between Comanche peak and Robinson creek a large quantity of gold had been buried by parties who on their return from the goldfields of California were attacked and killed by the Indians then infesting the country.
