Subscriptions are invariably payable in ad-
vance.The Legitimate Advertising of
Proprietary Medicines.The Bee has received a copy of a
paper entitled "A defense of prop-
rietary medical interests with regard to
advertising," which paper was read
by Ervin E. Kemp, general representa-
tive of the Proprietary Association,
editor of Standard Remedies, at the
daily newspapers' department asso-
ciated advertising clubs of the world,
at Philadelphia.The following is an excerpt from Mr.
Kemp's address:The business of manufacturing and
selling prepared medicines in packag-
es in which they may readily be rec-
ognized and identified is proper, and
economically necessary.I believe — and my belief is not
born over night — in advertising, and
in truth in advertising. The great
industry which I represent has dem-
onstrated its belief in advertising year after year, in good season and in
bad; it has recognized the necessity of
truth in advertising — and this is
proven by the fact that its advertising
has not been intermittent, but has been
steady and permanent.Advertising of proprietary medi-
cines, per se, does not need to be de-
fended. Such advertising is as legiti-
mate as any other advertising."What Every Business Man Wants
to Know.Friday, October 27 — Ernest Lee
Jahneke, "The Work that the Associa-
tion of Commerce is doing."Friday, October 3 — Theodore Brent,
"What New Orleans has and needs to
get in Freight Rates and Traffic Con-
ditions."Friday, November 10 — S. O. Landry,
"How to lay out an Advertisement and
the use of Illustrations."Saturday, November 18 — E. W.
Thompson, U. S. Commercial Attaché
at Berlin, "Selling Goods in Europe af-
ter the War."Friday, November 24 — J. G. Pepper,
"Buying Fire Insurance."No talk on Friday, December 1, (the
day after Thanksgiving). Further talks
in this series to be announced later.These talks give business men the
gist in the shortest time and with their
interest in mind.All these informal Friday night
talks are at 8 p. m., at the Associa-
tion of Commerce, and are under the

TO THE PUBLIC.

The New Orleans Bee, No. 520
Conti St., is prepared to publish in
the English language in its
daily paper all legal and judicial
advertisements and notices
at the rate of three and a half
(3 1/2) cents per agate line, net,
payable cash in advance, instead
of seven (7) cents per agate line
as heretofore.joint auspices of the Association of
Commerce and the Tulane College of
Commerce. They are not only for
members of the Association of Com-
merce but are open to all without
charge.You are invited to attend and to
take part in the questioning and dis-
cussion. A guarantee goes with these
meetings that they will close not later
than 9:30.We count on you to tell your asso-
ciates, heads of departments, and em-
ployees about these business talks by
business men.ERNEST LEE JAHNCKE,
President.
MORTON A. ALDRICH,
Dean.

Station; 6 lots in Flowerdale Subdivi-
sion; 1st, Carnation, Gladiolas, Geran-
ium and Rose avenue, \$39,500.—Drey-
fous.All ticks do not transmit the para-
site which produces tick or splenetic
fever. Only one species carrier the
disease, but it is easier to kill all blood
suckers on cattle than to pick out the
worst kind. Give the cattle the benefit
of the doubt.Tick or splenetic fever is caused by
microscopic parasites which get into
the animals' blood and attack and
break down the red blood corpuscles.When mother tick sucks blood from an
infected animal she ingests some
of these parasites and these get into
the eggs and continue in the seed
tick which hatches out. The seed tick
passes the disease to the first suscep-
tible cow or steer from which it gets
its first meal of blood.Cattle ticks are great survivors.
Many of them survive temperatures as
low as 20 degrees below freezing, while
eggs if protected by grass or similar
material may survive zero weather.Seed ticks can live in the grass for 3
or 4 months in warm weather, and for
8 months if winters are included, with-
out food. The longer they starve, how-
ever, the hungrier they get for cattle
blood. Starving ticks eat the slow
way. Dipping cattle in arsenic baths
kills the ticks at once.

Female Help.

Any individual or firm employing
female help, whether clerical or dom-
estic, should apply to Mrs. Olivia
Blanchard, U. S. Government Federated
Employment Clearing House, City Hall.

No charge whatever. Phone Main 852.

TICK TICKS NO. 2.

Would you rather have ticks or a

bank account?

If you keep accounts, charge ticks

on the loss side.

The cattle tick which carries splenetic

fever is known to science as "Margaropus annulatus." The cattle

fever tick, however, is a good enough

name to use in its epitaph, now being

written by the dipping vats.
